VIRGINIAN RAILWAY.—(*See Map.*)—The main line of the road extends from Deepwater, on the Kanawha River, in West Virginia, to Sewell's Point, on Hampton Roads, near Norfolk, Va., a distance of 442 miless Winding Gulf branch, Mullins, W. Va., to Pemberton, 24 miles; other branches, 4 m.; leases Virginian Term. Ry., 1.75 m.; trackage, 3 m.; total 475 miles. See V. 88, p. 102. Branches, total about 45 miles, are proposed. Built on modern lines and in the most substantial manner. The main traffic is in coal and lumber, but the country is described as rich in farm land, which should afford a diversified traffic, garden and farm products, &c. The road taps the Pocahontas and New River coal fields, and forms "the shortest possible route to tidewater over the lowest grades." From Princeton, the main coal-gathering yard, 350 miles west of Sewell's Point, the eastbound grade does not exceed 0.2 of 1%, or 10½ ft. per mile, except for a 9-mile section over the Allegheny Mountains, where the maximum grade is 0.6 of 1%, or 32 ft. per mile; on this section a pusher will be used. STOCK.—Under the aforesaid plan the $78,689,100 6% cum. non-voting pref. stock was given the right of exchange for 3 years from Jan. 1 1912 for two-thirds in amount of new 6% cum. pref. with voting power, along with $19 55 per $100 share in new Liggett & Myers Tobacco Co. pref. and $13 78 1-3 in new P. Lorillard Co. pref. stock for the remaining third. This will call for a total of $52,459,400. Said exchange may be made within three years from Jan. 10 1912 at the Guaranty Trust Co., N. Y.; $76,462,200 deposited for exchange to May 31 1912.

In Sept. 1911 to Mch. 1912 no dividends were paid on common stock, owing to decree of disintegration, but see distribution of securities below. In June 1912 dividends were resumed, 2½% being paid. V. 93, p. 347; V. 94, p. 418.

DISINTEGRATION.—The plan of Oct. 1911 (see V. 93, p. 1122, 1325, 1557, 1603, 1670) divided up the business of the company and its allies among "14 separate and independent companies, no one of them having control of or dominance in the trade as to any of the products manufactured by it, or as to purchase of raw material, and no one of them having any interest, by way of ownership of stock or otherwise, in any of the others. The order of the U. S. Circuit Court on Nov. 16 1911 confirming the plan enjoins the 14 defendant companies from combining ,making loans to one another, or having common officers or directors, &c., and forbids the individual defendants for 3 years from buying stock, except from each other. See V. 93, p. 1558.

The Fourteen Independent Companies.

These include the following, the American Stogie Co. alone of the existing companies being dissolved:

1. Present *Am. Tobacco Co.*, but shorn of $35,011,865 (book value) of investment securities, which were distributed as a dividend to its common shareholders, and charged to surplus; its bonds to be redeemed and its preferred stock reduced one-third and given voting power, and $58,699,011 of tangible assets and $56,300,989 trade-marks and brands (owned and acquired under plan) turned over to the two companies next mentioned.

2 & 3. The (new) *Liggett & Myers Tobacco Co.* and the (new) *P. Lorillard Co.* organized with capitalization as shown below, together aggregating $115,000,000, all turned over to Amer. Tobacco Co. in consideration for the aforesaid assets (see list, V. 93, p. 1122), including Federal Cigar Co., acquired by it from Am. Cigar Co., said capitalization being applied by Am. Tob. Co. as follows: The $52,118,375 5% and 7% bonds (with cash) to retire Am. Tob. bonds: the $26,229,700 7% cum. voting pref. (p. & d.) stock to retire 33 1-3% of Am. Tob. pref. stock and the $36,652,000 com. stock sold at par for cash to Am. Tob. common shareholders or others.

Said new 7% bonds and new 5% bonds mature at the time fixed, respectively, for the maturity of the 6% bonds (Oct. 1 1944) and the 4% bonds (Aug. 1 1951) of the Am. Tob. Co. previously outstanding, and are issued under an indenture of substantially like terms with the bond indenture of the Am. Tob. Co., the 7% bonds having priority in charge over the 5% bonds in the same way that the 6% bonds of the Am. Tob. Co. have had priority of charge over the 4% bonds.

4. *Am. Snuff Co.* turned over $8,600,588 of its tangible assets, &c., to the two new companies next mentioned, in exchange for their (total) $16,000,000 capitalization, and distributed the $8,000,000 common stock as a dividend to its own common shareholders, charging the same against surplus, and is using the $8,000,000 pref. to retire two-thirds of its own $12,000,000 pref. stock. Will also within 3 years dispose of its holdings of stock and bonds of the Am. Tob. Co. and pref. stock of Am. Cigar Co., aggregating in book value $2,530,217, upon which the Am. Snuff Co. received in interest and dividends during the year 1910 $176,680.

5 & 6. The *George W. Helme Co.* and the *Weyman & Bruton Co.*, new companies, organized with the capitalization shown below, took over a portion of the assets and business of American Snuff Co. See "4."

7. *MacAndrews & Forbes Co.* (licorice) turned over its Baltimore plant, &c. (retaining plant at Camden), to the (new) J. S. Young Co. for the latter's $2,000,000 capital stock, and distributed the $1,000,000 common as a dividend to its own common shareholders (charging the same against surplus), and is using the $1,000,000 7% non-voting pref. to retire by exchange $1,000,000 of its own $3,758,300 6% non-voting pref.

8. *J. S. Young Co.*—See MacAndrews & Forbes Co. above.

9-14. *Corporation of United Cigar Stores, &c.*—Organization undisturbed (see V. 93, p. 1108), but Am. Tob. Co. holdings to be distributed.

Am. Cigar Co. has sold for cash to Am. Tob. Co. (*a*) all the stock of the Federal Cigar Co. at $3,965,616; (*b*) the $657,000 stock owned in the Porto Rican-Am. Tob. Co. at $2,301,600, the former going to new P. Lorillard Co., the latter to the common stockholders of Am. Tob. Co.; (*c*) disposes of its interest in Am. Stogie Co. upon the dissolution of that Co. The Am. Cigar Co. does not figure as one of "the 14 independent companies," its output being relatively small.

In addition to the securities already distributed, as above stated, there are the following which at some later day are to be sold or distributed as dividend out of surplus: British-Amer. Tob. ,Ltd., non-voting preference shares; Imperial Tob. Co. (of Great Britain and Ireland , Ltd., ord. shares; Corp. of United Cigar Stores bonds; MacAndrews & Forbes Co. non-voting pref. stock. During the time these securities are left in the treasury, the Am. Tob. Co. to be enjoined from voting any thereof or using the same to control said companies.

E. I. DU PONT DE NEMOURS POWDER CO.—ORGANIZATION.—Incorporated May 19 1903. V. 76, p. 1251; V. 77, p. 453, 1535, 1748; V. 78, p. 290, 1112; V. 82, p. 1214; V. 84, p. 806; V. 91, p. 399, 1330. In June 1911 the U. S. Circuit Court ordered dissolution of company for violation of Anti-Trust law. V. 92, p. 1704; V. 93, p. 1388. Properties, &c., V. 85, p. 286, 342; V. 92, p. 1704. Suit, V. 93, p. 799.

DISSOLUTION PLAN.—On June 13 1912 decree was made by the U. S. Circuit Court of Appeals, providing for disintegration of company and controlled properties, per plan V. 94, p. 1386, 1629, 1698, by Dec. 15 1912, but extension of time may be asked for if necessary. The combination, composed of 27 companies, is to be dissolved, the business to be divided among 3 companies (including the present du Pont de Nemours Powder Co.) in such a way that competition will follow. The 15 plants for the manufacture of dynamite, 19 for the manufacture of black blasting powder, 4 for black sporting powder, 2 for smokeless sporting powder and 2 for Government smokeless powder will thus be apportioned among the 3 companies, two of which shall either be new corporations or shall use the charters of the Laflin & Rand Powder Co. and the Eastern Dynamite Co. If the Laflin & Rand Powder Co.'s charter is not used, that company is to be dissolved and its property distributed.

The two new corporations are to take over the properties assigned to them upon a valuation based upon the last inventory, to include a fair value for brands and good-will, and in consideration therefor to issue to the du Pont de Nemours Powder Co, 50% of the purchase price in bonds (non-mortgage maturing in ten years, bearing interest at 6% only if earned, and the remaining 50% in the stock of said two companies at par. The whole of the said stock and one-half of the bonds received is to be distributed among the stockholders of the du Pont company, one-half of the stock received by the 27 defendants to be stock without voting power, so that they will not have sufficient voting stock to control either of the two new corporations. The latter will thus be without fixed charges for ten years.

The E. I. du Pont de Nemours Co., the Hazard Powder Co., Delaware Securities Co., Delaware Investment Co., Eastern Dynamite Co., California Investment Co. and Judson Dynamite & Powder Co. will be dissolved, and their properties be distributed among their stockholders. The 27 defendants are jointly and severally enjoined from doing any act to further extend or enlarge the field of operation or the power of the combination or continuing or carrying the same into further effect.

The price of gas was fixed at 85 cents per 1,000 cu. ft. for 5 years from Feb. 1 1906. V. 82, p. 574; V. 84, p. 342. An ordinance was passed in July 1911 reducing the price from 85 to 75c. for the first year, 70 the 2d and 3d years and 68 the 4th and 5th years. The State Circuit Court in Dec. 1911 fixed the price at 80 cents, pending final disposition of the suit brought by company to enjoin enforcement of ordinance. V. 93, p. 349, 536, 1606; V. 94, p. 1190.

The Appellate Court on April 25 1912 reversed the decision of the State Circuit Court on Dec. 5 last in-so-far as it impounded the difference between the 80-cent rate and the 75-cent maximum rate fixed by the ordinance of July 17 1911 (without prejudice to the right of consumers to recover the same if the provisions of the gas ordinance are found to be reasonable. IN this new factory of ours—the largest and most complete of its kind in the world—are being printed securities for almost every civilized country on the globe. It is located at Hunt's Point, in the Bronx, New York City. The people in it equal the population of a good-sized city. The main pressroom contains 80,000 square feet, with a battery of 179 presses, enabling the company to meet any demand for prompt deliveries and rapid service.

THE plate vaults contain Engravings held for customers for more than a century. There are now in these vaults over 130,000 plates (subject to printing orders from the proper authorities) ready to put to press at a moment's notice.

The new plant is also equipped throughout with especially designed steel cages in which the work in progress is locked each night, thereby insuring accuracy of count and security. The buildings are absolutely fireproof. Frequent fire drills are held by employees.

The importance of the permanency and integrity of the institution that guards the plates and dies from which securities are printed cannot be overestimated. This new factory contains the systematized results of a hundred years spent in endeavoring to excel in **Security.**

The equipment of the type and ticket printing divisions of the American Bank Note Company is modern and complete. The composing room, electrotype foundry, press room and bindery, together with the map-engraving department, are models in their own peculiar and individual lines.

Ticket presses of great capacity enable us to offer to railroads and all users of tickets or coupons those much sought after but seldom found qualities—speed and accuracy. The American Bank Note Company would be glad to acquaint you personally with the operation and products of this modern plant.

THE PRESENT POSITION IN ELECTRIC TRACTION DEVELOPMENT.

Though no startling innovations were conspicuous during the past year in electrical development, so far as electric traction is concerned, the twelve-month may be regarded with some satisfaction as one of steady progress. No doubt the pressure of general industrial conditions tended to curtail schemes of electric railroad expansion, and consequently railway managers were prevented from engaging in more ambitious operations, such as a greater degree of prosperity would have warranted. Electrical engineers had their activities to a certain extent restricted. Economy was the watchword, and manufacturers of apparatus and equipment for electric traction perforce contented themselves with improving the machinery already established in type. A greater advance was made relatively in standardizing and perfecting existing models than in introducing new inventions. The regular operation, moreover, of electric railways in cities and in long-distance systems, without any extraneous disturbance to speak of, enabled the managers of these roads to record data of efficiency and unit cost which must materially assist the electrical industry, and with the diffusion of such knowledge allow of much more rapid progress when the expected period of activity arrives.

In the field of applying electric power, the progress of central stations has been specially noteworthy, as improvements have been effected in the load factors by the better arrangement of apparatus and the installation of more powerful and efficient machines, such as turbines. As the question of power cost is such an important item in the preliminaries of any traction proposition, it is evident that, from the standpoint of economy, the more complete and accurate systems of costs available to-day must be of the utmost service in framing trustworthy estimates. The application of electricity has widened on every hand in the past year and has given abundant evidence of the utility, reliability and satisfaction of the electric drive, which is now put to uses almost beyond number in connection with railroading.

One marked feature of the year was the well-proven success of the electrification of sections of trunk railroads, such as the New York division of the Pennsylvania RR., and the Hoosac Tunnel. Fresh confidence has been gained and engineers may look forward to the completion of the Boston Subway, the New York Westchester & Boston RR. and other similar undertakings in the present year with sure anticipation of corresponding satisfaction. Having authorized the extension of the New Haven's electric zone from Stamford to New Haven, that company hopes to have electric trains in operation between New York and New Haven by next December, adding 41 miles to the trackage already electrified. No detailed comparison is yet forthcoming from the New Haven regarding its present steam and electrical equipment, from either an operating or expense standpoint, as the results as yet are obscured by mixed steam and electric service and by the short length of the electric zone. In England, however, the experience of the London Brighton & South Coast Ry. promises to give decisive support to the plan for the electrification of the main line, soon to be put before the directors. On the Crystal Palace branch, opened last May, the increase in the passenger traffic carried in seven months was 70%, while the South London line, which had suffered a great decline from the competition of the municipal street tramways, has in two years of electrification more than made good its loss. Under the extension scheme, express trains will be run from London to Brighton, 51 miles, in about 45 minutes, and it is proposed to provide all branches with steam, gasoline or electric motor car service, operated at frequent intervals, to connect with the main-line trains making stops at the junction points.

Mr. Philip Dawson, the consulting electrical engineer of the road, takes these operating and financial achievements as amply justifying his original selection of the single-phase system in 1903, when its merits, though recognized for long-distance, were not established in comparison with the direct-current system for urban use. The whole case of long-distance electrification, as Mr. Dawson has been able to show most

effectively, rests upon cheap energy and efficient distribution. He concludes that railways should be able to buy alternating current energy at from 0.8 cent to 0.9 cent per kilowatt hour delivered. Owing to the loss in conversion and overhead charges on sub-stations, this cost would be increased with the direct-current system to from 1.2 cent to 1.35 cent, the cost of current representing from 50% to 60% of the total locomotive charges per train mile. Equally instructive are his results that the annual cost of maintenance and repairs of electric locomotives should be less than one-half that of steam locomotives, that five electric locomotives can do the work of eight steam engines, owing to the saving in time required for coaling, cleaning and watering, while the general expenditure on the maintenance of stations and bridges may be lessened by the absence of smoke and gases. That the London & Northwestern should have decided to electrify its London city and suburban lines is another significant indication of the present tendency.

To meet the special conditions of the N. Y. N. H. & Hartford Co., several improved designs and modifications were introduced last year by the equipment companies. The Westinghouse Company, in particular, developed three types of locomotives in which much greater simplicity is gained in the control system and other details than is found in the original forty-one locomotives furnished to the company. Eight motors are now employed on a locomotive, a two-coil transformer greatly lessening the chance of a breakdown. In alternating-current generators, a standard has been reached after exhaustive research and investigation, which gives a practicable, service-tried type of construction that answers to widely-varying conditions of capacity and speed. Generators connected to water wheels have made an exceptional advance in that, unlike generators driven by other prime movers, they may be now used to operate at speeds extreme in both directions. A generator of 4,000 kva., for instance, may be called upon to operate at a speed of less than 100 revolutions per minute, or higher than 514 revolutions per minute.

Interpole engine type generators, operating at very low temperatures with almost perfect commutation, rotary converters for high-voltage service, alternating to direct current synchronous motor-generator sets, the largest size being of 2,000 k. w. rating, as duplicated for the Rio de Janeiro Tramway, Light & Power Co., outdoor oil circuit-breakers for voltages from 40,000 to 11,000, and improved insulators, have all made steady progress in manufacture. It is in these intermediary machines, giving the operator a greater mastery and a surer control over the electric current, which he is annexing to almost every service of modern civilization, that the advance has been most decided.

THE SIZE LIMIT OF TURBO-GENERATORS FOR POWER TRANSMISSION.

The recent starting of a 20,000 kilowatt turbo-generator in New York was an event of the first importance in the development of electrical power generation and transmission. The first of the three prime movers installed by the New York Edison Company at its Waterside Station No. 1 is in successful operation, and is at present actually the largest unit of its kind in the world. With its fellows, the station will be equipped with three turbines aggregating 60,000 kilowatts, occupying a space formerly taken up by four 3,500 kilowatt engine-driven units, the increased capacity of 46,000 kilowatts showing the immense gain made. Chicago will quickly have in use a rival installation of the same size unit for the Commonwealth Company. In that city circumstances lend themselves to the utilization of these immense generators for traction purposes more readily than in New York, where the electric subways and street railroads provide sufficient power from their own plants. The question naturally arises how far the example of the two greatest cities of the United States will be followed in the other big towns of the country and also in foreign countries, if it is found that units of this, and even greater, size are economically valuable and proportionately more profitable for generating electricity for lighting, traction and commercial purposes generally.

The fact that the metropolitan area of London is divided among twenty-seven different electrical companies, with their individual plants, has created from the start conditions wholly different from those prevailing in New York. It is unlikely that the central stations in London will rank with the few big ones now established in New York. On the other hand, the great value of every square foot of ground on the Island of Manhattan makes it probable that, as the city's requirements and use of electric power grows, bigger plants will be installed outside the city and high-tension current will be transmitted from a distance. With this prospect, it is conceivable that the most economical operation might be obtained from a few units of great size, capable of generating an amount of electricity sufficient to satisfy the heaviest load the city might need for traction, lighting, factories and other utilities, such as elevators, with the proper number of transformers and converters in the distribution system. The recent announcement that capital is being raised for the erection of a power station on the anthracite coal field, using low-grade waste coal at the mouth of the mines for generating electricity, with a view to the transmission of high-tension power ultimately to Philadelphia and New York, indicates that practical steps are already being taken in this direction.

At the present time it is estimated that Greater New York is consuming daily between 600,000 and 700,000 kilowatts, or the average equivalent of 900,000 horsepower. Of this quantity the Edison Supply Co. furnishes between a third and a half from its several stations. According to the latest compilation a few months ago, the number of incandescent lamps lighted by the company in Manhattan and the Bronx of 16 candle-power is 4,784,352, the arc lamps number 37,364, vapor arcs, 1,616, heaters 2,157 kilowatts and storage batteries 8,358 kilowatts. The motors operated with the power supply represent 298,937 horsepower. These motors are not classified for different classes of service; but among the innumerable trades and occupations which find a habitat in New York—the most diverse manufacturing centre in the world—there are very few to which electric motors have not been applied.

All kinds of services demanded by the industrial, social and domestic requirements in every section of the city, it may be generally stated, are now furnished with electric power. It lights, heats, cools with fans, lifts, draws, cooks, vitalizes and destroys. It is worth while recounting what each of these 20,000 kilowatt—equivalent to 30,000 horse-power—turbines can do and what are its requirements. It will generate capacity sufficient to light up contemporaneously

more than 1,000,000 incandescent metallic-filament lamps of 16 candle-power. It would drive across the Atlantic an ocean liner like the Olympic. It concentrates in one unit power represented by thirty of the largest express locomotives and a line of horses six abreast ten miles long. To obtain this generation, the turbine will use 7,200,000 pounds of steam per day, and, at an evaporation of nine pounds of water per pound of coal, 400 tons of coal must be burned per day in its use. This means the consumption of 86,000,000 gallons of condensing water per day, or, for the three units, almost as much water as is required for the daily water-supply of the whole city. To cool the generating windings, each unit requires 80,000 cubic feet of air per minute, or a daily total of 115,000,000 cubic feet.

It is remarkable, taking the New York and Chicago 20,000 kilowatt turbo-generators as an illustration, how consistently the development of the distribution of electrical energy has followed the course marked out by engineers in the early days of the electric industry, a quarter of a century ago.

As soon as the limitations of the direct-current high-tension transmission were recognized, and the alternating-current transformer had been brought into the field, the problem was solved by the inventions of Gaulard and Gibbs, who devised a high-efficiency direct-current auto-commutating machine, which was a self-starting, single-phase, 50-cycle, rotary converter. This system, it may be recalled, was first demonstrated at the Turin Exhibition of 1884, where a 30-h. p. 2,000-volt single-phase alternator was shown, feeding a single-wire transmission circuit 48 miles long, having connected in series along its route a number of transformers of the Gaulard and Gibbs type, feeding at different voltage through their secondaries a variety of incandescent and arc lamps. The results, as Mr. Philip Torchio pointed out ten years later to the International Electrical Congress at St. Louis, attracted the widest attention among engineers, and gave the clue for the system of distribution by combining the properties and advantages of the alternating current and direct system which is being generally followed to-day, and is applicable to traction and other purposes besides lighting. In no essential features has the system as developed departed from the general lines conceived in the early eighties. The problem of distribution was narrowed down to the consideration of the engineering and commercial features. Development has taken place along sure lines in recent years, in increasing the size of the units of apparatus, improvements in the transmission and in the invention of minor accessories. It remains true that there has been little revolutionary in the development of the means for the transmission of power. Much of the work in this direction during the last few years has been of an unobtrusive character, mere extension, without material change of what had gone before.

Since the introduction of the turbine, nothing has been a more striking illustration of the saving in space, while gaining an increase of power, than the installation of the large-size generator. The three 20,000-kilowatt turbines, which will all be in operation at the Waterside Station in the present year, give approximately four times the power formerly obtained from the same floor space. As compared with the reciprocating engines which the turbines have generally displaced, the advantages in economy of labor, cost of operation and in reliability of the prime mover—the most vital and essential element in electrical operation—are claimed to be on the side of the turbine as the size increases. The central station power company which proposes, therefore, to supply power for traction purposes as well as for industrial plants will find this a valuable consideration.

It remains to be seen where will arise the limitation of size in these prime movers. In densely-populated cities like New York, where there is little space within the city's area unutilized and where the city's map is definitely laid out in blocks of a regulation size, alteration of present power houses by increasing their size, to admit the increased size of machinery, may be prohibitive. Owing to the size of the city block in New York, it is estimated that only half a square foot is available for a kilowatt of capacity. Chicago and Boston, however, having more free ground, reckon 2½ feet as available. Younger cities, in making provision for the future, should either make their plans accordingly or place their stations well outside the city's limits, if water and fuel can be obtained as cheaply as under the other circumstances.

The essential auxiliary equipment of boiler and engineroom for the greater size generator units is another factor that may be decisive against much increase in magnitude. There is also the difficulty in transportation, as the great weight of the parts of the machinery is taxing the present capacity of the railroads. Much in the same way, the growth in the size of steamships has approached the limits of channels and docks, so that advantages of economical operation are lost in the excessive charges incidental to securing it.

TRACK CONSTRUCTION AND THE LIFE OF RAILS.

Track construction has been claiming a greater share of attention at recent electric railway conventions, both in the United States and Europe, than has been noticeable in former years. General managers and engineers, it would seem, have formed a common conclusion that, in the general rise in the cost of operation, keener scrutiny should be devoted to the composition of the roadbed and to the quality and maintenance of the rails employed for the tracks. By some it is asserted that at the present time the track is the least satisfactory part of the equipment of an electric railway. Rail corrugation in the rails laid down for our street lines is a subject of as much importance as in the tracks of the steam railroads. As the electric cars employed in city and suburban traffic and on the long-distance inter-city lines have increased in weight and speed, troubles with the rails have developed, unknown in the early days of electric railroading. Information as to the wear and behavior of rails under electric traction has hitherto been scanty and unsystematic.

The standards and specifications that have been laid down for the rails supplied in England, according to the best expert authorities, are not such as befit the latest conditions. Here in the United States questions of the value of the physical properties of a road, the wear and tear due to the operation of heavy interurban cars, the cost of repairs to the track, and its replacement, matters of obsolescence and depreciation, are constantly cropping up in the applications made to the public service commissions and in the course of their investigations. Hence the importance attached by the accounting departments of electric railway corporations to such matters as the life of the material used and of property like ties, trolley wire and rails.

At the Atlantic City convention, it was wisely decided that the accountants' and engineering associations should co-operate in the collection of information of this nature, obtained by carefully kept records, on which to base a report next year. The reports presented at the Glasgow meeting of the Municipal Tramways Association by the permanent engineers of the Glasgow, Manchester and Leeds corporation street railway systems brought together answers in reply to a number of questions sent to electric railroad engineers throughout Great Britain, as to the rails used, the construction of track and the methods employed in repairing worn parts. From the answers received it is apparent that, though the British standard sections of rail in one or other of its forms has been generally adopted by the larger systems, and is popular, yet several alterations are required to keep the rails abreast of the times, and that in several points modifications and revisions should be attended to without delay. An investigation by the Engineering Standards Committee into the several improved methods of producing alloy steels, with a view to determining a standard quality of steel for tramway rails, was, in the opinion of the Leeds Chief Engineer, urgently needed.

Much diversity of practice and difference of opinion were shown to exist in the important matter of rail-joints. The thermit welded joint appears to be the most popular form of joint at the present day. In Leeds during the past eight years 11,000 joints have been welded on new and reconstructed tracks, with results declared to be exceedingly satisfactory. The percentage of breakages has shown a marked decline as the application of the process has been better understood. This verdict was endorsed at Manchester, but the experience at Glasgow, on the other hand, was discouraging. On the whole, the conclusion was reached that the use of a better and more suitable quality of steel would remove much of the controversy as to the best treatment of worn and open joints. The composition of the steel given in the British standard specifications, the reporting engineers thought, cannot be classed as a high quality steel, and is by no means a grade suitable for electric traction under the latest conditions.

One of these demanding serious attention, as it throws a heavy extra cost upon the street railway companies, is the rapidly-increasing transit of exceptionally heavy loads along the street-surface tracks. It is noted that the mode of conveying materials has been completely revolutionized within the last few years, as the number of commercial motors with trailers in use is increasing at a great rate in the industrial districts of England. As these vehicles, carrying heavy loads, use the centre of the street, the amount of damage done by the crushing of the pavement and pressure on the rails is very great, frequently entailing large additional expense in maintenance. As regards the length of the rails, it may be noted that the English practice inclines to the use of the 60-foot rail, with even longer lengths favored wherever the local conditions render their adoption possible. The experience collated in the answers brought together enforces the lesson that electric traction needs the very best steel procurable for the purpose, and that in the end this is found to be the cheapest economically.

Inasmuch as the rail plays such an important part in the life of the track, the need of keeping careful records of the kind, weight and length of rails, the number and kind of ties, the paving, &c., entering into the construction, together with the date of installation and dates when repairs were made, should appeal to the officers of every electric road aspiring to sound economical operation. The papers put before the New York State Association Convention from the auditing and engineering standpoints, on the life of railway physical property, presented the case for co-operation in a convincing manner. The data submitted by Mr. F. A. Bagg, Chief Engineer of the Fonda Johnstown & Gloversville RR., affords a basis for comparison which will doubtless be useful to operating engineers of systems in every part of the country. Thus, the rails in paved streets of cities up to 25,000 population, with a weight of 70 pounds or less, is given a life of 14 years; the rail on interurban lines, weight 60 pounds or less, a life of 15 years. Ties in open track, if of cedar are credited with a life of from 15 to 20 years; if of yellow pine from 10 to 15 years, and if treated, 25 years or more. Wooden bridges are supposed to have a life of 20 years and steel bridges 30 and over. Ashlar concrete bridge masonry is estimated to enjoy a life of a hundred years and over. Asphalt pavement should be good for from 10 to 15 years of ordinary wear and tear, and brick paving may be considered to last from 15 to 25 years. Trolley wire ought to be in use for from 15 to 20 years, the trolley poles supporting it, if of cedar, having a contemporaneous existence. Yellow pine may endure for 10 to 15 years, chestnut for 15 on the average.

Supplementary confirmation of the experience described in rail wear was afforded in valuable notes contributed to the New York discussion by Mr. M. J. French, engineer of maintenance of way of the Oneida Ry., Syracuse. All estimates of the life of electric railway track structures, in his opinion, have up to the present time practically been merely intelligent guesses. Calculations may be easily upset by the increase in weight of rolling stock, the change in depth of wheel flanges, the change from single to double-truck cars, and continually increasing traffic. The troubles of the railway company's maintenance force may be aggravated, as in New York City streets, by the sinking of tracks caused by the passage over them of the heavy girders and boilers used in the latest high buildings. Carelessly-supervised and uncoördinated operations of contractors' work in sewers, subways, and gas and water mains impair the track through settlement. Against like troubles the maintenance engineer must always be on his guard, but in the sphere of his own special study the track engineer has acquired in practice many useful devices or means for the rehabilitation of track at a comparatively small cost. The rate of rail wear in a year under ordinary city traffic, determined by Cleveland so long ago as 1903 and checked by recent measurements in experiments with a 95-lb. nine-inch girder rail, has been placed at 1-64 inch under a one-minute car headway.

Under this rule, Mr. French estimates that a rail having a depth of head of 1¼ in. should last thirty years under ⅞ in. flanges on cars operating on five-minute headway. As a rail shows signs of wearing, its life may be prolonged at least 25% by the use of base-supported joints and a power-driven grinder. Sufficient data have not yet been accumulated for settled judgment on the merits of improved types of rail-joints or of the "thermit" or of the electric and cast-welded joints. Joint plates may, however, be safely assumed to have a life of from eight to twelve years under heavy and light traffic conditions, respectively. A practical formula that was recommended in relation to track depreciation was that which is followed by the Utica & Mohawk Ry. Co., and has been tested by five years' service proving its fairness. In accordance with this, from 10 to 12% should be allowed for track depreciation under heaviest operation, 8% in the principal residential districts and 6% under the lightest traffic conditions.

SECURITIES AND REPORTS.

This is one of our six Sections or Supplements. In using the series it is to be remembered that they are inter-dependent publications, complete only as a whole. If utilized together, and with the fresh items of news the "Chronicle" contains from week to week, the investor will have all the information he needs in seeking a safe and remunerative lodgment for his money.

Street and Electric Railways forcibly illustrate this inter-dependence. Such roads obviously rely for their income, and therefore in great part for the value of their securities, upon the population and activity of the country they serve. Hence constant reference to our "State and City" section will be found necessary by those wishing to purchase the stocks and bonds of street roads. Population, assessed valuation, tax rate, total debts of the counties, cities and minor municipalities are given at length in that publication, every one of which items is an essential fact contributing more or less to any correct estimate of the amount of suburban travel a given road commands.

The *abbreviations* used in our Electric Railway statements will be found explained in a table immediately following the last statement in this publication.

A full *Index*, which shows where each railway will be found, is also given on the closing pages.

BOSTON, MASS.

BOSTON ELEVATED RAILWAY.—(*See Map on page* 13.)

ORGANIZATION.—Charter granted in 1897 provides for an extensive system of free transfers. The company also, in addition to regular street railway taxes, has to pay ⅛ of 1% of gross "earnings of all lines owned, leased or operated by it," and a sum equal to the excess of the dividends over 6%. Its charter, however, is understood to "grant it exemption from reduction of fares, and also other immunities." (See Massachusetts RR. Commission, V 65, p. 1223.) Elevated cars run with electricity by "third-rail" system; surface lines by trolley. Six miles of elevated road opened in June 1901; in Aug. 1901 put in operation the Atlantic Ave. Loop Division.

Extension.—An extension of the elevated road to Forest Hills was put in operation Nov. 22 1909; V. 89, p. 1410. In April 1905 $7,500,000 new bonds were issued to provide for this extension and for payment of floating debt, &c. See V. 80, p. 1423.

On April 29 1903 leased from the Old Colony Street Ry. (now merged in the Bay State St. Ry.) all that company's tracks in the city of Boston, amounting to 23.753 miles. The lease is for 99 years and provides that besides paying taxes the Elevated Co. will pay 6 ½% of replacement value (appraised at $353,979, less the rental of certain short pieces of track appraised at $13,866) of the property leased as of date Feb. 16 1903, and 4% on the cost of all additions and betterments.

Lease of West End and Subway and Tunnels.—The West End Street Ry. is leased until June 10 1922.

In Dec. 1896 the West End Street Ry. leased the right to use the Tremont Street subway in Boston. See terms under West End Street Ry.

On Dec. 24 1904 the East Boston tunnel (under Boston Harbor) was leased by the Boston Elevated Ry. until June 10 1922 for a rental of ⅛ of 1% of earnings of all lines owned, leased or operated. The company also collects a toll of one cent per person, which goes to the city; but under the general extension of contracts made in 1911, this provision will be eliminated after June 10 1922. The tunnel was opened Dec. 30 1904. It extends from the main land to East Boston, 1.4 miles, and cost $3,500,000.

On June 28 1902 Washington Street Subway bill became a law. The city has constructed a tunnel for elevated trains and leased same to the Boston Elevated Ry. for 25 years at an annual rental of 4 ½% of total cost of construction, which up to June 30 1911 was $8,224,702. V. 88, p. 98. Proposition was ratified by voters at Dec. 1902 election. V. 75, p. 28, 496, 1315; V. 77, p. 2097; V. 82, p. 217. The Washington Street tunnel began operation Nov. 30 1908. V. 87, p. 1477. In 1907 an Act was passed modifying plans somewhat, and permitting Boston Transit Commission to construct a subway to be known as the Riverbank Subway, but this was repealed in 1911.

Subways in Cambridge.—In June 1906 a measure passed by the Massachusetts Legislature became a law, which permits the Boston Elevated to construct two subways in Cambridge, and to issue stock or bonds to meet the cost. At the end of 20 years the city of Cambridge is to have the right to purchase these subways by paying their cost plus 7% interest, less dividends. V. 83, p. 93. See remarks concerning these subways in company's report for 1906, as given in V. 84, p. 155. Work on subways was begun Aug. 12 1909. The company in 1908 filed with the Mass. RR. Comm. preliminary estimates of the cost, showing an aggregate of $10,639,278. See V. 87, p. 1662. On Jan. 4 1911 the first through train was run in the new subway; general travel will not be started, however, for several weeks.

New Construction of Subways and Old Contracts to be Extended.—In July 1911 Mass. Legislature passed an Act (accepted by the city and Bost. Elev. in Sept. 1911) providing for the construction by the city of three additional subways, viz.: Dorchester Tunnel, Boylston St. Subway and East Boston Tunnel extensions and the extension of all existing contracts until July 1 1936, the date to which contracts for new lines are to run. Annual rental after expiration of old contracts to be as follows: Tremont St. Subway (see under West End), 4 ½% on net cost; East Boston tunnel (now expiring June 10 1922), 4 ½% on net cost (provision for tolls from passengers using the tunnel eliminated for extension period); Washington St. tunnel (now expiring Nov. 30 1933), 4 ½% on net cost. Annual rental for new lines: Cambridge connection, for first 20 years, 4 ⅞% on net cost; thereafter 4 ½% on net cost; Dorchester, Boylston East Boston tunnel extension, 4 ½% on net cost. The Act also provides that all contracts are to continue after July 1 1936 until terminated by a two-years' notice by either party. The various new leases and extensions of old leases were signed by the parties thereto on Dec. 7 1911. V. 93, p. 1785.

Damages by Noise.—In Aug. 1902 Judge Mason, in the Superior Court at Boston, held that the company is liable for damages from noise caused by the operation of trains. V. 75, p. 496. This was affirmed April 1903, by Massachusetts Supreme Court. V. 76, p. 809.

Consolidation with West End Street Ry.—In July 1911 Massachusetts Legislature passed an Act (signed by the Governor on July 21 1911) superseding that approved May 28 1908 (V. 86, p. 917, 1342), permitting the consolidation of Boston Elev. and West End St. Ry. at the expiration of the present lease, on June 10 1922. 8% cum. 1st pref. stock of Bost. Elev. (having the ordinary voting powers, but not "entitled to participate in any increase or issue of new stock, com. or pref."), to be issued, $ for $, for West End pref. and 7% cum. (or 8% if arbitrators so decide) 2d pref. (having all voting powers without exception) for com. stock of West End. After the issue of the new pref. shares no other stock to be issued "prior or equal to such 1st pref. and 2d pref. stock without the consent of two-thirds of the holders of such stocks, respectively." The Act also provides that the Street Ry. shall forthwith sell to the Elev. Co. all unused real estate, the proceeds not exceeding $1,500,000 to be invested as a special trust fund and accumulate until June 10 1922. Thereafter the annual income thereof shall be applied to cancellation of 2d pref. stock. When all the 2d pref. has been retired then said fund shall be applied by the Elevated Ry. Co. to any purpose for which stock and bonds can legally be issued. See terms of Act in V. 93, p. 344. Shareholders of both the Boston Elev. and West End St. Ry. approved the Act; the former on Aug. 24 1911 and the latter on Sept. 6 1911. V. 93, p. 666. Holders of West End com. and pref. stock may on or before June 10 1922 exchange their stock at par for Elevated Ry. common. After June 10 1922 holders of Bost. Elev. 1st or 2d pref. may exchange their stock for an equal amount at par of Bost. Elev. com.

West End interests have a suit pending in Federal Court to test the constitutionality of the merger Act.

BOSTON SUBURBAN ELECTRIC COMPANIES.—A trolley system.

ORGANIZATION.—This company is a voluntary association formed in Nov. 1901 on the same lines as the Massachusetts Electric Companies. The properties controlled are the Lexington & Boston Street Ry. and the Middlesex & Boston Street Ry. (into which the Natick & Cochituate St. Ry., the Westboro & Hopkinton St. Ry., the Newton & Boston St. Ry. and the Newton St. Ry. have been merged). The entire issues of the stock of these roads have been acquired. In 1902 also purchased Norumbega Park and Lexington Park. In 1908 Massachusetts Railroad Commission sustained action increasing fares on several of the subsidiary lines from 5 to 6 cents. V. 87, p. 345. Has acquired freight rights in several of the towns along its lines.

Waltham Gas Property.—In 1902 secured entire ($324,700) capital stock of the Waltham Gas Light Co., V. 74, p. 377. On April 28 1909 shareholders voted to sell property and liquidate company. The price received was $1,100,000, but $350,000 went to retire outstanding notes, leaving $750,000 cash. This was used to reduce Boston Sub. Elec. floating debt and to retire the shares of the latter originally issued to cover the Waltham Gas property. See V. 89, p. 720, 846, 1068.

STOCK.—Shares have no par value, but in case of liquidation the preferred shareholders will be entitled to $100 per share, with accrued dividends; the common shares participating pro rata in the remaining assets. (See V. 73, p. 1159, 1263.) In 1904 15,635 shares of preferred and 15,635 shares of common were offered to shareholders at $66 67 for one share of pref. and one share of com. jointly. Listed on Boston Stk. Exch. in Apr. 1905

The *Brooklyn City RR. Co.* is held under a 999-year lease dated Feb. 14 1893, guaranteeing all fixed charges, organization expenses, taxes and 10% dividend on $12 000,000 of stock. The lease is nominally to the Brooklyn Heights RR. Co., but the Brooklyn Rapid Transit Co. owns the entire capital stock of the Brooklyn Heights Co In 1898 the Heights Company leased the Brooklyn Queens County & Suburban RR. The lease was renewed year by year, rental being fixed charges, taxes and organization expenses. On July 1 1901 the B. Q. C. & S. began operating separately again. On April 1 1899 the Heights Company temporarily leased the Nassau Electric RR. Later permanent leases were made, but on June 30 1904 presumably in consequence of a decision (V. 79, p. 102) compelling the issuance of transfers, the lease of the Nassau Electric RR. was canceled.

The Brooklyn Heights RR. in April 1899 leased for the period of 999 years the Prospect Park & Coney Island RR. (see terms under the latter), the New York & Coney Island RR. and the Prospect Park & South Brooklyn RR., but the leases of these companies were assigned in March 1907 to South Brooklyn Rwy., which had been acquired by purchase in Feb. 1902. V. 74, p. 479. The South Brooklyn Rwy. owns the double-track road (1¼ miles) extending from New York Bay, near 38th St., Brooklyn, to 38th St., near 9th Ave., Bklyn, and in June 1907 increased its stock from $150.000 to $500,000.

In Nov. 1905 purchased at foreclosure for $262,000 the road of the Brooklyn & Rockaway Beach RR., 3¼ miles, from East New York to Canarsie, and later organized the Canarsie RR. Co., with $250,000 capital, to operate the road. V. 82, p. 1155. The entire stock of this company is owned by the Transit Development Co. Through elevated train service from the Broadway Ferry, adjoining the Williamsburgh Bridge, to Canarsie was instituted July 30 1906. V. 83, p. 271; through service over the bridge to Delancey St., New York, was put in operation on Sept. 16 1908, the connection from Broadway Elev. to Bridge structure having been completed.

On May 21 1904 the Brooklyn Heights Railroad Co. signed an agreement with the city for operation of trolley cars over the new Williamsburg Bridge. See V. 78, p. 2013, 2386. Later the Bridge Operating Co was formed, with $100,000 capital, to operate local service on the bridge. See V. 79, p. 626. Through surface cars are operated over bridge by Brooklyn Heights RR., Nassau Elec. RR. and B'klyn Queens Co. & Sub RR. Surface cars began to cross this bridge in Nov. 1904. V. 79, p. 2084

In Sept. 1909 cable line on Montague St. between Court St. and Wall St. Ferry was replaced by trolley.

Decision in Suit Against Brooklyn City RR.—On Feb. 25 1910 Referee D Cady Herrick in suit of Brooklyn Heights RR. Co. against the Brooklyn City RR., begun in April 1900, awarded judgment for $1,740,258 principal, with $1,616,680 interest from April 1 1894. See V. 70, p. 841; V. 80, p. 1174; V. 90, p. 558. Brooklyn City RR. has taken an appeal. V. 90, p. 625; V. 90, p. 770. Pending the appeal, Bklyn. City Ry. in July 1910 reduced its div. to 2% quar., ½ of 1% being retained quar. and set aside in a special fund to be returned to stockholders if not used in settlement of Brooklyn Heights Co. claim. V. 91, p. 93.

Extensions.—On April 6 1910 applied to Pub. Ser. Comm. and the Board of Estimate for permission to use the proposed Canal St. Subway in Manhattan, offering to run cars over the Manhattan Bridge through the proposed subway to West St., Manhattan, for a 5-cent fare. Application was also made to build to the Brooklyn end of the Manhattan Bridge and oprate a 3-cent service over the bridge similar to arrangements now in effect on the Brooklyn and Williamsburg bridges. V. 90, p. 976. On April 12 1910 the Brooklyn Union Elev. applied to the Pub. Ser. Comm. to operate its cars over the Manhattan part of the bridge loop subway from the Manhattan terminus of the Williamsburg Bridge to the Brooklyn Bridge. V. 90, p. 1044. In June 1910 the Commission rejected the terms of the company's offer and held that the yearly rental should be based on the basis of an estimated cost (for the portion to be used) of $7,500,000 instead of an assumed cost of $4,000,000. On Dec. 19 1910 applied to Pub. Serv. Comm. to use the two easterly tracks in the Centre St. subway loop between the Williamsburgh Bridge and Canal St. for trolley car operation, and the two westerly tracks between the Williamsburgh Bridge and Brooklyn Bridge for its elevated roads. V. 91, p. 1710. On Jan. 10 1911 made a dual proposition to the Pub. Serv. Comm. to operate the 4th Ave. Subway in Brooklyn and to four-track the Brighton Beach Line. See details of proposition in V. 92, p. 117.

Proposals for Subways in Manhattan.—On April 25 1911 made an offer to the city supplemental to one made on March 2 1911 (V. 92, p. 593) to operate subways and elevated lines to be constructed affording rapid transit connections between all five boroughs. See V. 92, p. 596, 1177. See also report of special transit committee, approved by Pub. Serv. Comm., in V. 92, p. 1635. In July 1911 the city offered to enter into arrangements with the company looking to the operation by it, when same are constructed, of about 66 miles of subway and elevated lines, forming a new system in Manhattan, Brooklyn, Queens and Richmond. See V. 93, p. 43, 230, 285; also company's annual report in V. 93, p. 812.

Valuation of Property.—In Dec. 1909 Bion J. Arnold, Consulting Engineer of the Public Service Com., in hearings on the application pending before the Commission to reduce fare to Coney Island from 10 to 5 cents, estimated the valuation of the physical property of the company, including percentages for contractors' profits, incidentals, &c., as $100,705,689; value of non-operative property, $2,511,099; total cost of reproduction alone, $103,216,789. (V. 89, p. 1595.) In this real estate has been taken at its assessed value, and Mr. Arnold thought that, allowing for this and other items, the total might be brought up to approximate the capitalization of the co.

Special Franchise Tax Reduced.—For decision allowing for obsolescence in fixing special franchise tax, see V. 91, p. 1511.

Express Matter.—On Jan. 1 1909 the contract with the American Express Co., under which the latter company had been using the Brooklyn Rapid Transit system for distribution of express matter, expired, and was not renewed. V. 88, p. 157.

Damage Suits Against Line in Union Street.—On May 2 1910 the Court of Appeals at Albany affirmed judgments in favor of property owners claiming injury from the construction of the trolley line in Union Street. V. 90, p. 1238.

The *Transit Development Co.* was organized in April 1903 under the Business Corporation law, with $25,000 capital, and is owned exclusively in the interest of the Brooklyn Rapid Transit Co. It is authorized to manufacture and sell power and to do general contracting work. On March 1 1907 special arrangement was made by which the concern furnishes power and takes charge of the maintenance and repair of all the railway properties in the Brooklyn Rapid Transit system, including their equipment. V. 84, p. 569. In June 1907 capital stock was increased to $500,000.

The American Railway Traffic Co. was incorporated in Jan. 1904 with a capital of $1,000,000 (of which $980,000 is owned by the Transit Development Co.) for the purpose of hauling and disposing of city's ashes and refuse. Contract with city expiring Dec. 27 1908 was not renewed and company will be dissolved. In June 1911 was in process of dissolution.

Division of Territory with Long Island RR.—At an investigation by the Public Service Commission in Nov. 1907 it developed that on April 1 1899 an "agreement of alliance" had been entered into with the Long Island RR. for division of territory. "Long Island territory" is described as part of Queens County and the counties of Nassau and Suffolk, while "Transit territory" includes all of Kings County and part of Queens. Besides this, there is neutral territory consisting of College Point, Flushing, Jamaica and the islands in Jamaica Bay, into which neither may enter without the consent of the other.

Re-Classification of System Lines.—Owing to the opinion of the Court of Appeals in its decision upholding the right of the Brooklyn Heights RR. to charge 10 cents fare to Coney Island, to the effect that Article IV of the Railroad Law relates only to street surface railroads and that different provisions govern elevated and steam surface railroads, a re-classification of the roads of the system was made in March 1907 so as to limit the functions of each railroad to the operation of its own character of railroad. Accordingly the Brooklyn Union Elevated now operates only the elevated roads and the street surface railroad corporations operate street surface roads only. As part of this arrangement the leases of the Brooklyn Union Elevated RR., the Sea Beach Ry. and the South Brooklyn Ry. to the Brooklyn Heights RR. were terminated. The leases of the Prospect Park & Coney Island Ry., the New York & Coney Island Rr., the Prospect Park & So. B'klyn Ry. were assigned to the So. B'klyn Ry. V. 84, p. 569.

Transfers and Fares.—For decisions as to transfers, see V. 79, p. 2204 2587. Also see V. 82, p. 1323. In Aug. 1907 the Appellate Division of the Supreme Court in Brooklyn held that cumulative penalties could not be collected for refusal to issue transfers—see V. 85, p. 404. In June 1906 transfer system was greatly extended. For decision as to expired franchises, see V. 82, p. 1101. In Dec. 1908 Public Service Commission dismissed a complaint to reduce the fare to Flushing from 10 to 5 cents. V. 87, p. 1604.

In Aug. 1906 the company's right to charge a 10-cent fare to Coney Island was disputed and riotous proceedings resulted. See V. 82, p. 379, 435, 686. In Jan. 1907 Court of Appeals sustained the company's contention as to the legality of the 10-cent fare. See V. 84, p. 101. On May 23 1908 Gov. Hughes vetoed a bill which, though general in form, was intended to provide a 5-cent fare from Manhattan to Coney Island. V. 86, p. 1342. On Mch. 8 1910 Pub. Ser. Comm. also upheld the 10-cent fare to Coney Island. V. 90, p. 696. In July 1911 voluntarily agreed to put into effect between Aug. 1 and Oct. 1 a round-trip fare of 10 cts., good to Coney Island between 6 a. m. and 9 a. m. and good for the return trip between 2 p. m. and 4:30 p. m. V. 93, p. 285.

Mortgages of Constituent Companies to Secure Advances by Brooklyn Rapid Transit.—In May 1907 the New York State RR. Comm. consented to the Sea Beach Ry., the Canarsie RR. and the South Brooklyn Ry. making mortgages of $2,000,000, $2,000,000 and $4,000,000 respectively to secure certificates of indebtedness issued by those companies to the Brooklyn Rapid Transit for moneys advanced for additions, betterments, &c. In June 1907 Brooklyn Union Elevated authorized a mtge for $20,000,000 and the Nassau Electric for $5,000,000 for same purpose; but in July 1908 Public Service Commission denied application for the approval of these latter two mortgages. See particulars V. 87, p. 224. No bonds will be issued under any of these mtges., which are created simply to secure the certificates of indebtedness as issued from time to time. The certificates cannot be issued at less than par and are deposited under the Brooklyn Rapid Transit first refunding mtge. V. 84, p 1181, 1246, 1550.

Dividends.—First div., 1%, paid April 1 1909; July, 1%; Oct., 1%. In 1910, 4 %; in 1911, 5%; in 1912, Jan., 1½%.

Interest on Bonds, Where Payable.—Interest on the Brooklyn Rapid Transit mortgage of 1902 for $150,000,000 and the two Elevated issues is payable at the Central Trust Co.; on the B. R. T. issue of 1895 at the Trust Co. of America; on the Brooklyn City RR. refunding bonds at company's office; on the Nassau Electric bonds, including Atlantic Avenue and West End issues, at the Trust Co. of America; on the Brooklyn Heights first mortgage at the People's Trust Co., Brooklyn; on the Brooklyn Queens County & Suburban mortgages and the Jamaica & Brooklyn first mortgage at the Long Island Loan & Trust Co., B'klyn; and on the Sea Beach 1st mtg. at the Sea Beach Ry. office, 85 Clinton St., B'klyn.

Mortgage for $150,000,000.—Stockholders authorized March 20 1902 first refunding 4% gold convertible bonds for $150,000,000. $59,356,000 is intended to retire all the existing bonds of the system (including the $7,000,000 Brooklyn Transit 5s), and the rest for improvements, additions and new acquisitions, as needed from time to time. The mortgage provides that a fund of $5,000,000 in bonds or their proceeds be at all times at the disposal of the company for the purposes mentioned. See V. 74 p. 377. As this fund is reduced for any of the purposes authorized, more bonds may be authenticated by trustee and delivered to the company on its order. These bonds can be converted into stock, par for par, before July 1 1914, and are subject to call on any interest day until year 2000 at 110 and interest; after that at par and interest. See listing applications in V. 81, p. 1856, 1857, for list of securities pledged for the bonds; also listing applications in V. 82, p. 517; V. 83, p. 1122; V. 85, p. 1523; V. 86, p. 923, and V. 90, p. 786.

Bonds.—Of the $7,000,000 50-year gold 5s of the Brooklyn Rapid Transit, $3,000,000 went to stockholders for the assessment. For description of property covered by the mortgage, see V. 62, p. 1138. See also application in V. 67, p. 904.

Brooklyn City RR. mortgage of 1891 is for $6,000,000 and is a first lien on the old Brooklyn City road and a consolidated lien on the lines acquired by consolidation in 1890. Of the $6,000,000 issued, $4,373,000 are in the hands of the public and the balance is held in the guaranty fund.

Stockholders of Brooklyn City RR. July 10 1906 authorized a new mortgage for $6,925,000 to provide for refunding. V. 82, p. 1437. These bonds are subject to call after July 1 1915 at 110 and interest.

The total authorized issue of first consolidated mortgage gold 5s of the Brooklyn Queens County & Suburban RR. is $4,500,000, of which $1,616,000 are reserved for extensions, on which they will be a first lien. Of the $2,884,000 outstanding, $2,255,000 in 1898 were endorsed with the guaranty of the Brooklyn Heights RR. Co. as to principal and interest, and in Jan. 1899 provision was made for guaranteeing the remainder of the payment of $10 per bond. Both B. Q. C. & S. loans are subject to call in 1916.

The Sea Beach Ry. 1st 4s also are guaranteed as to principal and interest by the Brooklyn Rapid Transit Co. V. 65, p. 1219.

The Nassau Electric bonds are guaranteed (by endorsement on each bond) by the Brooklyn Heights RR. Besides covering the mileage directly owned they are a lien by a supplemental agreement upon the stock of the Coney Island & Gravesend Ry. and the Sea Beach Ry. and will become a direct lien on these lines should the latter become merged in the Nassau Electric. Of the total of $15,000,000 bonds authorized, the unissued remainder ($3,544,000) is for prior liens. See listing application in V. 72, p. 342.

Bonds and Stock.—Of the $30,000,000 collateral trust mortgage, $12,285,000 were originally reserved to take up an equal amount of the underlying bonds of the allied and controlled companies outstanding, and $620,000 of that amount has been issued for that purpose, leaving $11,665,000

still reserved. Car trust certificates No. 2 are secured by title to 150 cars. They fall due in semi-annual installments of $30,000 each from Dec. 1906 to June 1916 inclusive. Car trust certificates No. 3 are secured by title to 50 cars. They fall due in semi-annual installments of $12,000 March 1 and $13,000 Sept. 1 from March 1 1908 to Sept. 1 1917.

Franchises.—In June 1906 we were informed that the majority of the franchises in Buffalo are practically perpetual, none in Buffalo or other cities and towns having then an unexpired term of less than 40 years, excepting only the Fillmore Avenue franchise, covering an extension of 6½ miles on the east side in Buffalo, which was limited to 25 years; also portions of Franklin, Pearl, Genesee, W. Seneca, Morgan, and W. Chippewa Sts.; extension of Morgan St. or Elmwood Ave., in the Terrace and College Place.

Consolidation of Constituent Companies.—On Feb. 20 1902 the International Railway Company was incorporated in New York with $10,120,500 stock, and in Aug. 1902 this was increased to $17,000,000, of which $16,320,500 has been issued (all owned by the International Traction Co.), as a consolidation of the following companies, whose shares had previously been held by the Traction Co.; V. 74, p. 427.

Buffalo Railway Co. (after Buffalo Traction and Buffalo Bellevue & Lancaster had first been merged in the same).
Buffalo & Niagara Falls Electric Railway.
Buffalo & Lockport Railway (after Elmwood Ave. and Tonawanda Electric Railway had been merged).
Buffalo Tonawanda & Niagara Falls Electric RR. Co.
Lockport & Olcott Railway.
Niagara Falls & Suspension Bridge Railway (after the Niagara Falls Whirlpool & Northern Ry. had been merged in it).
Niagara Falls Suspension Bridge Co.

The Buffalo Railway owned the $2,860,000 stock of the Crosstown Street Ry. of Buffalo, and this passed to the International Railway Co.

On July 1 1902 the International Ry. Co. acquired by purchase the Niagara Falls Park & River Ry., the Clifton Suspension Bridge Co., the Lewiston Connect. Bridge Co. and Queenston Heights Bridge Co. This leaves the Crosstown St. Ry. Co. of Buffalo, the Electric City Ry., the Frontier Elec. Ry. and Inter. Ry. Co. as the only operating companies, and eventually (that is, as soon as the $1,000,000 Buffalo Ry. debentures secured by $2,000,000 stock of the Crosstown St. Ry. are retired) the Crosstown St. Ry. can also be merged, thus leaving the International *Railway* Co., the Frontier Elec. Ry. and the Electric City Ry. the sole operating companies and the International Traction Co. the holding company.

(1) Chicago City Railway.—An electric road.

ORGANIZATION.—Incorporated in Feb. 1859, and has extensive surface road privileges in the south division of Chicago. In June 1908 entered into a contract with the Commonwealth-Edison Co., by which the Chicago City Ry. agrees to buy all of its electric power from that company until June 1918. The railway has abandoned its producing plants but retains its distributing plants. V. 87, p. 1010.

New Ordinances and Franchises.—On Feb. 4 1907 the City Council passed ordinances providing for a settlement of the franchise question. These ordinances were approved at the city election on April 2 1907 and formally accepted by the company's board of directors on April 15 1907. An extended outline of these ordinances, one to the Chicago City Railway Co., and covering the lines operated by that company, and the other to the Chicago Rys. Co., and covering the lines of the former Chicago Union Traction Co. (now the Chicago Railways Co.), was given in V. 84, p. 1123. The value of the tangible and intangible property of the Chicago City Ry. at date of the ordinances was fixed at $21,000,000. The city or any company authorized by it is given the right on Feb. 1 or Aug. 1 of any year, on six months' notice, to purchase the entire property of the two systems, or either of them, at their value at date of ordinance, plus "the cost of rehabilitation and extensions, including fair allowances for construction, profit and brokerage." But if the properties are acquired for operation by a private corporation, for its own profit, the purchase price is to be increased 20%—barring the case of a private company which might be willing to turn over to the city all profits above 5% on the cost of the investment. The companies are limited during their operation to an interest return of 5% upon the agreed value plus the cost of rehabilitation and extensions. All net profits above this are to be divided on the basis of 55% to the city and 45% to the companies, but a deficit in any year is to be made good out of the profits of subsequent years. After April 15 1910 the companies are required to set aside 6% of the gross receipts for maintenance and repairs and an additional 8% of the gross receipts to cover renewals and depreciation. Whatever portion of the two funds is not used, remains in the funds and passes to the city or its licensee upon purchase. But if the two funds are not sufficient for the purposes named, the companies are obligated to supply additional funds.

Free transfers are required over all connecting lines within the city limits covered by the Chicago Railways Co., the Chicago City Ry., the Chicago Consolidated system and the Chicago General Ry. (except territory bounded by 12th St., south and main branches of Chicago River and Lake Michigan, until subways are in operation, when transfers will be given at all intersections in the subways), provided the passenger has paid a five-cent fare and is traveling in any one general direction. Certain extensions are provided, and the Chicago City Company agreed to construct in addition the equivalent of eight miles of single track and the Chicago Railways system the equivalent of twelve miles of single track, in each year after the third year. The companies also agree, upon demand of the city, to furnish funds not exceeding $5,000,000 in the aggregate for the construction of a central down-town subway to be built and owned by the city, two-fifths of the cost to be borne by the Chicago City Ry. and three-fifths by the Chicago Railways. Section 25 of Chicago City Ry. ordinance fixes the capital investment limitation of the company as follows: "The company shall not be required on account of any extensions or subways or on account of underground trolleys, or on account of any extensions of its street railways, other than the extension provided for in exhibit "A," and in Section 36 of this ordinance, and four (4) miles of double or eight (8) miles of single track per annum, as in Section 3 hereof provided, to increase its total capital investment to such an extent that the return thereon over and above the interest charge of 5% thereon by this ordinance authorized would be reduced to an inadequate or unreasonably small amount."

The franchises granted by the ordinances run until Feb. 1 1927. The city reserves the right at any time to commute a sum not exceeding the city's share of the net receipts for the previous year into a reduction of the rates of fare.

Calumet & South Chicago Operated.—Under an operating agreement entered into in 1908, operates the Calumet & South Chicago Ry. and will also direct the work of its rehabilitation.

Southern St. Ry. Operated.—Under ordinance which went into force April 1 1909, operates the Southern St. Ry. and will carry on work of the rehabilitation of that road.

(2) Calumet & South Chicago Ry.—Electric.

ORGANIZATION.—Is a consolidation formed in 1908 of the Calumet Electric Street Ry. and South Chicago City Ry. in accordance with the terms of ordinance passed by the City Council March 30 1908. Lines are located in the south division of the city of Chicago. The ordinance grants *franchises* until Feb. 1 1927 and provides that the city is to receive 55% of net receipts after allowing for operating expenses, taxes and depreciation and 5% on present value, together with amounts expended for improvements and extensions. Interchange of transfers with Chicago City Ry. by establishing four transfer zones is provided, but in three of these zones free transfers cannot be compelled unless net earnings for preceding year were equal to 5% on the investment and the company's share of the net earnings amounts to 1¼% additional. City may purchase property on Feb. 1 or Aug. 1 of any year upon six months' notice, for present value, which is fixed at $5,000,000 plus amount expended for improvements, additions and extensions, but only for municipal operation, where purchase is made prior to Feb. 1 1927. With an addition of 20% in price, city may also purchase for the purpose of turning property over to other parties (If purchased for Chicago City Ry. only 12% additional need be paid), but this additional sum need not be paid where these other parties agree to pay over to the city *all* of the profits above 5% on the purchase price. V. 86, p. 1223. On Jan. 31 1911 certified value of property and additions thereto was $7,888,013.

In Dec. '10 increased stock from $5,000,000 to $10,000,000. V. 91, p. 1628.

Operating Agreement with Chicago City Railway Co.—On June 29 1908 Chicago City Council approved agreement by which Chicago City Ry. agrees to operate Calumet & South Chicago Ry. Co.'s street railway system, and to place in operation the zone system of transfers, as described above. The latter company agrees to pay actual cost of this operation, and joint costs are to be paid by both companies in proportion to gross receipts of each, with certain exceptions. In addition, Calumet & South Chicago Ry. will pay Chicago City Ry. ¼ of the actual saving in oper. exp. resulting from joint operation, such saving to be determined by a board of engineers. See V. 87, p. 224.

CHICAGO & SOUTHERN TRACTION CO.—An electric road.

Receivership.—On Oct. 11 1910 Jos. E. Otis and Matthew Slush (Pres. of co.) were appointed receivers, int. on bonds being in default. V. 91, p. 1025, 518; V. 90, p. 626, 302. About Nov. 1 1911 Judge Walker in Circuit Court authorized the sale of the property at foreclosure. V. 93, p. 1259. It was expected the sale would take place sometime in Jan. 1912. In Dec. 1911 the City Council failed to pass an ordinance providing for the acquisition of the lines within the city by the Chicago City Ry. It is expected ordinance will be re-introduced.

ORGANIZATION.—Incorporated in 1904. In July 1907 purchased the Chicago Electric Traction Co. (successor to the Englewood & Chicago Electric Ry.) at foreclosure sale. Of the $5,000,000 bonds given below, $2,500,000 were used to build the road from Harvey to Kankakee, and to purchase the Chic. Elect. Trac. Co. running from Harvey to Chicago. CHICAGO & MILWAUKEE ELECTRIC RR.—A trolley road.

Receivership.—On Jan. 28 1908 Judge Grosscup appointed W. Irving Osborne, Chicago; D. B. Hanna, Vice-Pres. Canadian Northern Ry., Toronto, and H. A. Haugen, Pres. State Bank of Chicago, receivers. George G. Moore was subsequently substituted for Mr. Haugen. See V. 86, p. 284, 337, 1223. In Feb. 1911 W. O. Johnson (a director of the Western Trust Co., Chic.) was appointed as receiver by Judge Grosscup, the former receivers being retained as advisers. V. 92, p. 525. April 1908 Judge Grosscup authorized the Wisconsin corporation to issue $1,000,000 receivers' certificates to complete road (V. 86, p. 917, 1159, 1223). Interest due July 1 1908 on the $4,000,000 bonds of 1902 is in default; the interest due on $1,080,000 1st M. bonds of 1899, however, has been paid. Default also occurred on Wisconsin Division bonds July 1 1908. V. 87, p. 96. Sink. fund due July 1910 and 1911 on *Ry.* 1st M. of 1899 was not paid.

Foreclosure Suit.—In Nov. 1908 Wisconsin Div. bondholders' protective committee approved the action to foreclose the mtge. on the Wisconsin division and authorized the filing of a bill for similar action with regard to the Illinois division. In Dec. 1908 Judge Grosscup entered an order consolidating the various foreclosure suits. V. 87, p. 1237, 1477, 1604. The consolidated bill sought to establish and foreclose an equitable lien in favor of all the holders of Wisconsin bonds against the Illinois property, on the ground that some $2,000,000 of the proceeds of these bonds were used for the benefit of the Illinois portion of the line. V. 87, p. 1532, 1663. This threatened to displace the Illinois division bonds' first lien on the Illinois property, and a protective committee of Illinois division bonds has been formed. V. 87, p. 1604, 1663; V. 88, p. 374. In 1911, however, a committee of Canadian holders of Wisconsin Div. bonds purchased practically all the Illinois Division bonds. Decree of foreclosure under the Illinois Div. mtge. was signed by Judge Grosscup in Oct. 1911 (V. 93, p. 939), but on Nov. 24 1911 suit was referred back to Master (V. 93, p. 1461), and is still pending.

In Jan. 1912 a new reorganization committee was formed, composed of representatives of both the Wisconsin and Illinois div. bondholders, and a plan of reorganization is looked for shortly. V. 94, p. 206. As to tentative reorganization plan formed in Sept. 1911, see V. 93, p. 730; also V. 91, p. 518; V. 92, p. 260, 321, 1635.

On July 28 1911 Judge Grosscup maintained that the entire $10,000,000 of Wisc. Div. bonds had been validly issued. V. 93, p. 345.

ORGANIZATION.—Incorporated under the general railroad laws of Illinois and Wisconsin and has the same privilege as steam roads. &This company was successor by purchase on Dec. 31 1902 of the Chicago f Milwaukee Electric *Railway* Co. Leases the Chic. & Milw. Elec. RR. o Wisconsin for 50 years from 1905, and guarantees its bonds, both principal and interest. Does a freight business. *Franchises*, except 4, are said to be perpetual; serves 25 cities and towns.

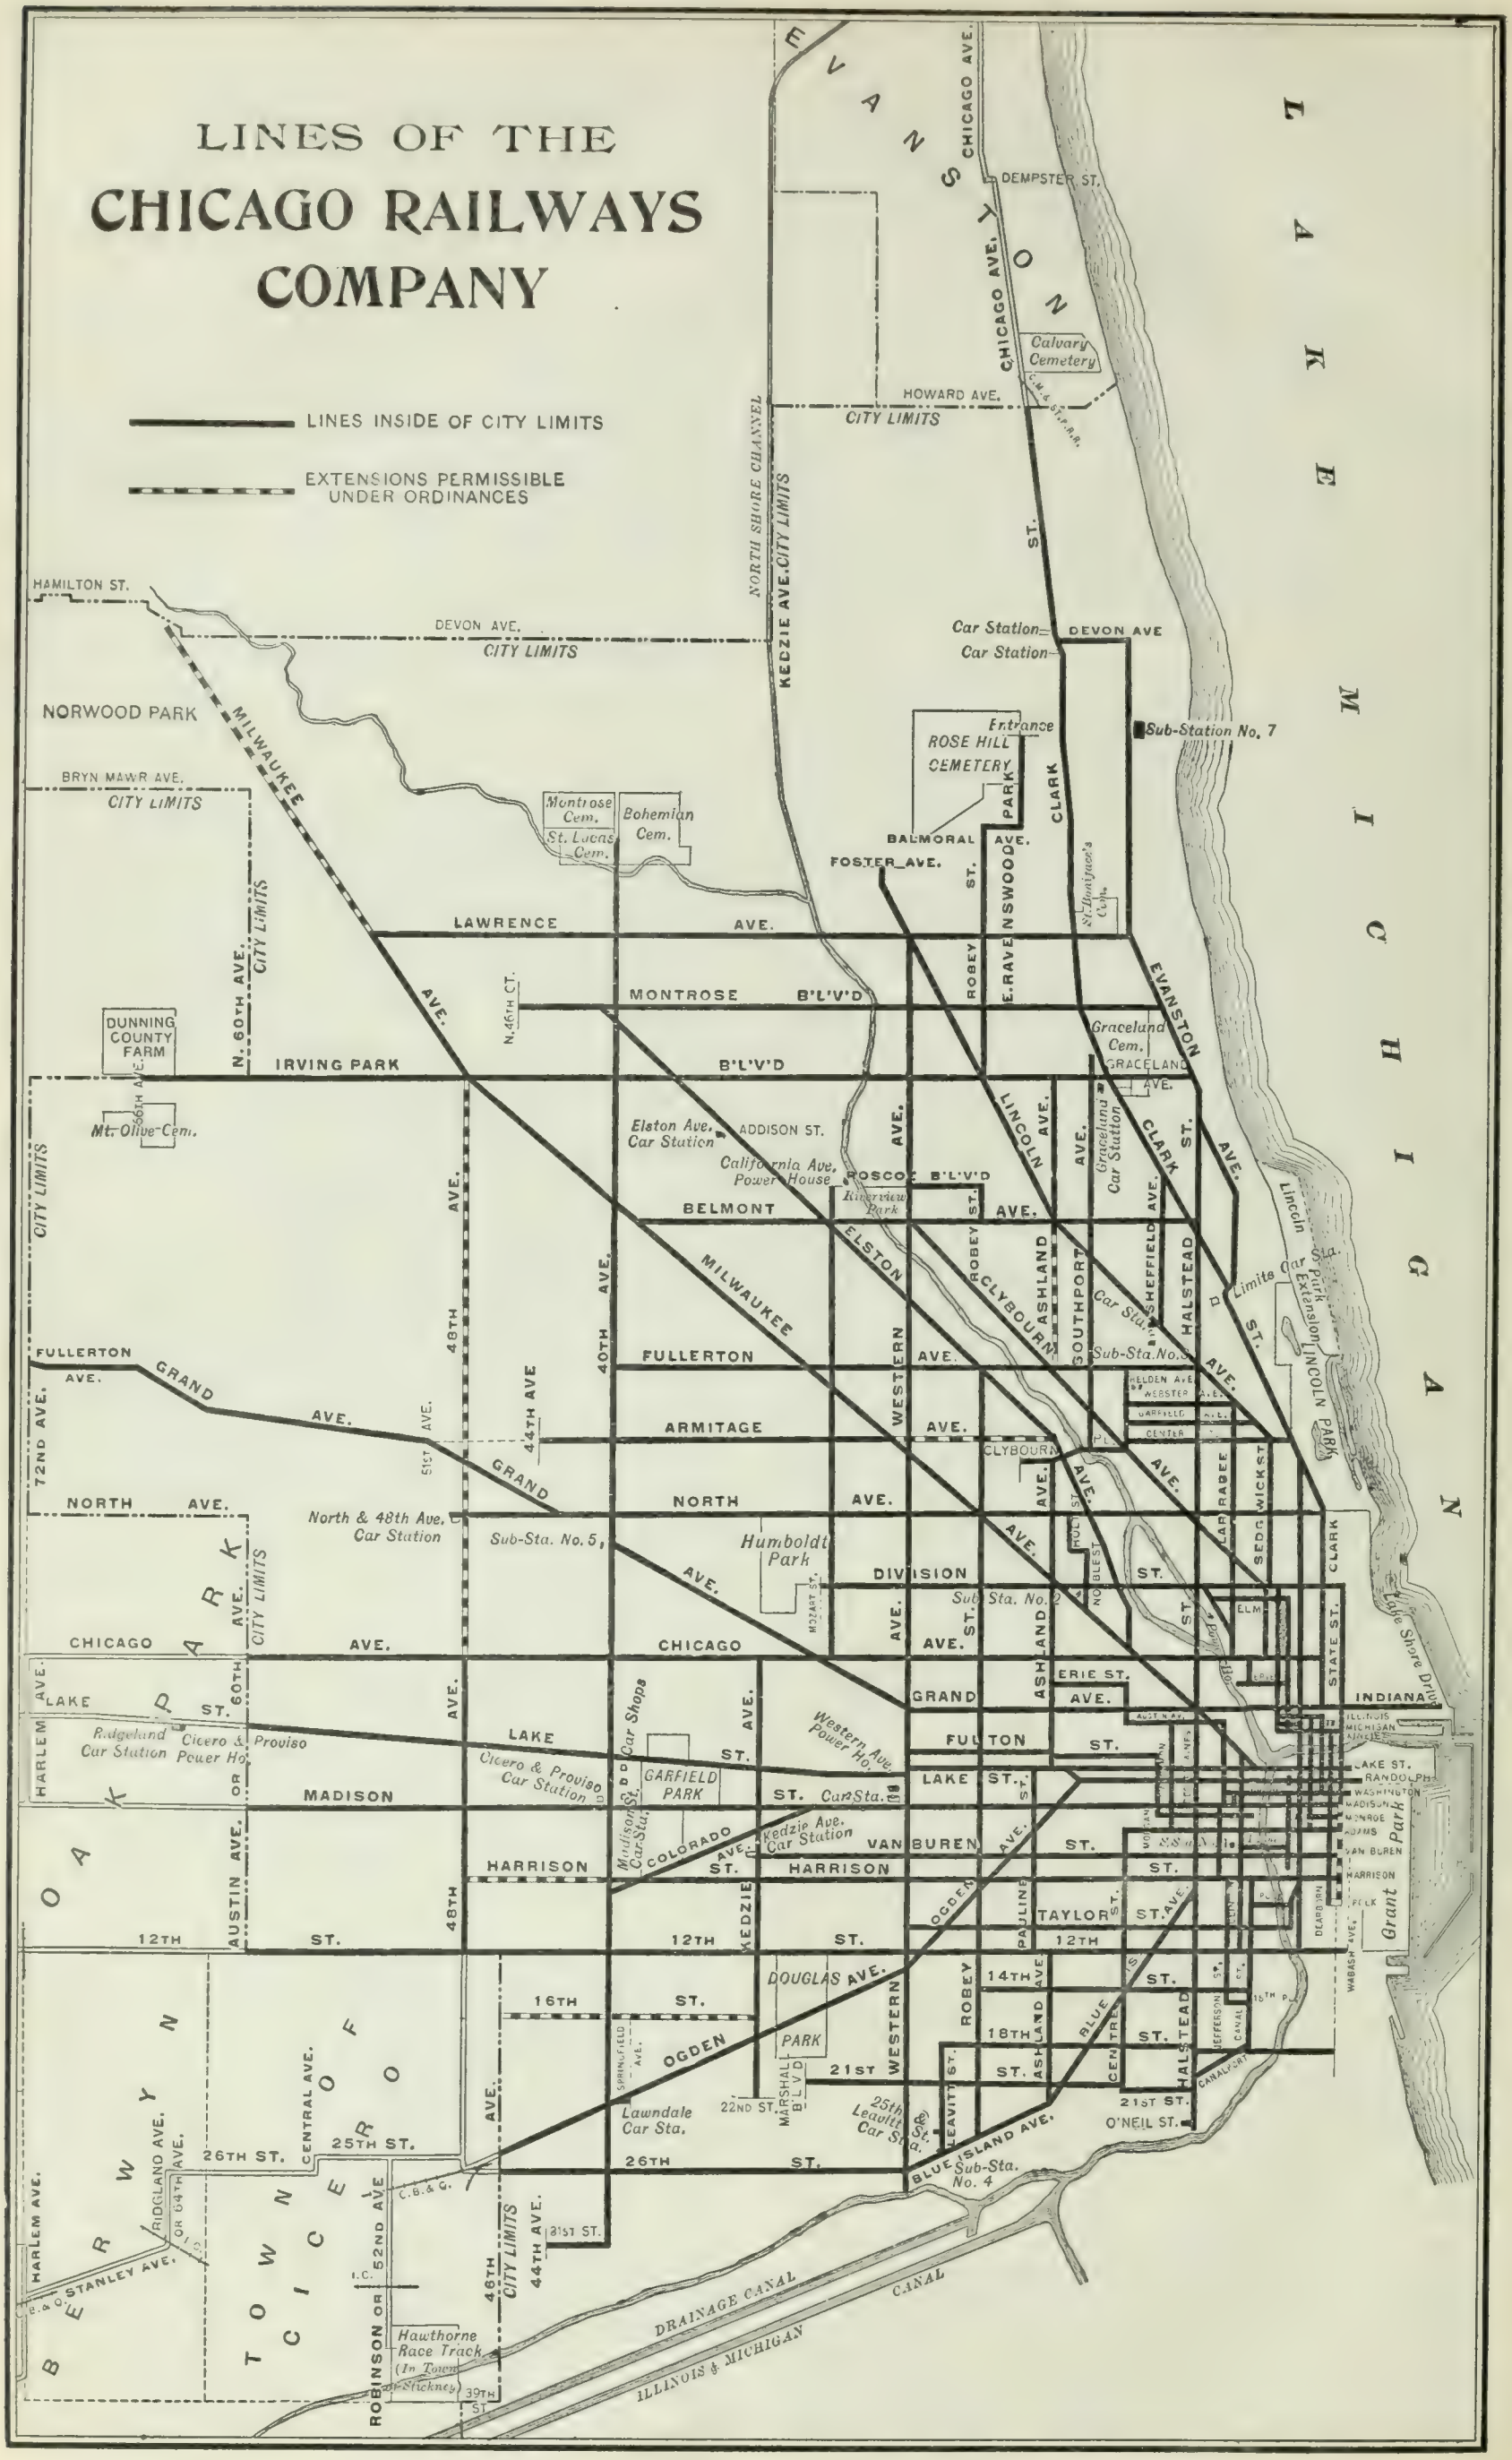
Proposition to Unite Surface and Elevated Lines.—In Dec. 1911 negotiations between the city and Henry A. Blair, representing Chicago Rys.; I. M. Cobe, Chic. City & Conn. Rys., and Samuel Insull, the Chic. Elev. Rys., for the merger of the surface and elevated lines, were progressing favorably. V. 93, p. 1190, 1599.

ORGANIZATION.—Incorporated in Illinois in Oct. 1903 and on Jan. 25 1908 acquired at foreclosure sale the property of the old Chicago Union Traction, comprising the lines of the North and West Chicago Street RRs. The purchase was made under a modified plan of reorganization and readjustment dated Oct. 15 1907 and outlined in V. 85, p. 1269; see also p. 1576

Franchises.—On Feb. 5 1907 the City Council passed ordinances providing for a settlement of the relations between the city and the street railway companies. V. 84, p. 338, 390. The *franchises* granted by the ordinances expire Feb. 11 1927 and were approved at the popular election held April 2 1907. On Oct. 10 1910 supplemental ordinance was passed expiring Feb. 1927, covering lines of Chic. Consol. Trac. properties. V. 91, p. 1025.

In the remarks concerning the Chicago City Ry. on a preceding page of this publication will be found a brief summary of the main terms, requirements and conditions of these ordinances. A very extended outline of the same was printed in the "Chronicle" of May 11 1907, pages 1123, 1124 and 1125, to which the reader is referred for detailed information.



The ordinance for the Chicago Rys. Co. provides that the valuation of the properties acquired shall be deemed and considered to be $29,000,000 (the value fixed by a board of expert engineers acting for the city) plus $1,779,875 for expenditures from the date of the valuation on June 30 1906 to Feb. 1 1907, making total valuation of properties as recognized by ordinance $30,779,875 as of Feb. 1 1907. With the further expenditures already made and upon the expenditure of proceeds of all bonds now outstanding, the valuation of road, equipment and franchises will be not less than $76,863,605. V. 87, p. 677; V. 88, p. 504.

All expenditures for reconstruction and extensions are being made under the direct supervision of a board of supervising engineers headed by Mr. Bion J. Arnold, and the company is required, under conservative restrictions, to advance moneys for the construction of subways by the city. The expenditures for reconstruction and extensions, including any contributions for subways, after Feb. 1 1907 are to be added to the value of the properties recognized by the ordinance, together with 5% of such expenditures for brokerage. As compensation for its services in construction, the company will receive an additional 10% of all expenditures for reconstruction and extensions, exclusive of amounts contributed for subways. The company agreed to lower and reconstruct the tunnels under the Chicago River at Washington, La Salle and Van Buren streets. The ordinance requires through routing over certain lines of the Chicago City Ry. Co. and the exchange of transfers with that company. The lines of the Chicago City Ry. Co. cover what is known as the South Side of Chicago, and the lines of the Chicago Rwys. Co. the North and West Sides.

LINES OF THE CHICAGO RAILWAYS COMPANY

LINES INSIDE OF CITY LIMITS

EXTENSIONS PERMISSIBLE UNDER ORDINANCES

Right to Purchase by City.—Under the terms of the franchise, the company agreed to waive all rights under previous grants, and granted the city an option to purchase all of its property for municipal operation at any time prior to the expiration of the 20-year franchise granted the company by the ordinance. The price to be paid by the city to be $30,779,875, the valuation of the properties February 1 1907, as above mentioned, plus all expenditures after that date for reconstruction, extensions and additions to the properties, including any amounts advanced to the city for construction of subways in the downtown business district. In case the property shall not be purchased, as above stated, prior to 1927, the expiration of the present franchise, the city covenants that it will not then grant a franchise to any other corporation for the operation of a competing system in the company's territory, unless such other corporation shall purchase the property of the company at said price. The city also has the option of requiring the company to sell its property to any other licensee corporation of the city, or to purchase the property itself for municipal ownership (with no requirement as to municipal operation) at any time during the life of the franchise; but in case of such purchase by the city or a licensee, the price to be paid shall be 20% more than the price above mentioned; but the licensee shall not be required to pay the additional 20% if it shall agree to pay over to the city all profits in excess of 5% on the investment. In any event (1) the purchase price must be paid in cash and deposited in national or State banks, each of which must have a capital and surplus of at least $1,000,000, and must be approved by the company, and the first mortgage bonds of the company will attach to such cash as a first lien in the event of such purchase; or (2) such purchase (if made within said 20 years) must be consummated expressly subject to the lien of the 1st mtg. bonds, but if made at the expiration of said 20 years, the amount thereof must also be so paid in cash.

Compensation to City.—The company is entitled to a straight 5-cent fare, with universal transfers. In turn provision is made for special compensation to the City of Chicago, but this compensation is payable only out of the surplus earnings of the company after paying or providing for all operating expenses, including the charges for maintenance and depreciation prescribed in the ordinance, and 5% upon the valuation of the company's property at which it may be purchased by the city for municipal operation, as above stated. Of the surplus earnings so remaining, the City of Chicago receives 55% and the company 45%.

Control by Trustees.—The trust indenture securing the participation certificates provides that until Aug. 1 1912, and to the full extent thereafter which may be permitted by law until all of the consolidated mortgage bonds of the company shall be fully paid and discharged, the directors of the company shall be elected by Messrs. A. C. Bartlett, Chauncey Keep, Charles H. Hulburd, Albert A. Sprague and Charles G. Dawes of Chicago, and provision is made in the trust deed securing the 1st mtge. bonds for the appointment of a permanent finance committee, composed of Messrs. Henry A. Blair Chauncey Keep and B. A. Eckhart of Chicago.

Acquisition of Chicago Consolidated Traction Properties.—On Dec. 27 1910 Judge Grosscup confirmed the sale of the Chic. Consol. Trac. Co. and its eight underlying companies on Nov. 30 1910 to Andrew Cooke, and the sale by the latter of all properties *within* the city limits to the Chicago Railways Co. (V. 91, p. 945, 1253, 1511), pursuant to an ordinance passed Oct. 10 1910 (placing valuation at $4,021,982), like in tenor, amendatory and supplemental to ordinance of Feb. 11 1907 (V. 91, p. 1025, 1159). See reorganization plan, V. 90, p. 1613; V. 91, p. 37. The lines *outside* the city were acquired by the County Traction Co., which has no connection, either corporate or operating (except as noted below), with the Chicago Rys. On Nov. 1 1910 a deposit agreement was entered into by the holders of the securities of Chic. Consol. Trac. and its subsidiaries, providing for the exchange of said securities for Chic. Rys. Co. Purchase Money 4% to 5% bonds and Adjustment Income 4% bonds, both dated Jan. 1 1911 and maturing Feb. 1 1927. For description of bonds and terms of exchange, see V. 91, p. 1384, and compare V. 90, p. 1613; V. 91, p. 214.

Contract for Power.—On July 30 1909 reached agreement with the Com.-Edison Co. for power for a period of 6 years from Feb. 1908. V. 89, p. 348.

Stock.—The capital stock of the company, which is issued in the nominal amount of $100,000, has been made the subject of a trust agreement, dated Aug. 1 1907, and executed Jan. 25 1908, by and between the Chicago Railways Co. and Messrs. Adolphus C. Bartlett, Chauncey Keep, Charles H. Hulburd, Albert A. Sprague and Charles G. Dawes, as depositaries, and Central Trust Company of New York, as custodian. Under this agreement the stock serves as a basis for the issue of the *participation certificates*, representing in all 265,100 equal parts. Series 1 consists of 30,800 parts, Series 2 of 124,300 parts, Series 3 of 60,000 parts and Series 4 of 50,000 parts. Series 1, 2 and 3 are entitled, in the order of priority named, to cumulative dividends of $8 for each part, beginning with year ending Aug. 1 1908, and in the distribution of capital to $100 for each said part. Series 4 is entitled to any remaining profits or capital distributed. V. 85, p. 1269.

Dividends on participation certificates Series 2 are limited to $4 on each certificate so long as more than 50% of Series C bonds remain outstanding, and thereafter to $5 per certificate until the remainder of Series C bonds have been redeemed. Series 2, however, is entitled to unpaid accumulation on account of its $8 per certificate (beginning with the year ending Aug. 1 1908), but only when earned, and after payment of all accumulations of sinking fund and of dividends on Series 1.

Bonds.—First mtge. bonds are issued only to provide funds for rehabilitation, extensions, &c. They may be redeemed at par and accrued interest on any interest day. The bonds have a first lien on the entire property rights and franchises of the company. The authorized issue is limited to the aggregate of the amounts approved from time to time by the board of supervising engineers. See full particulars of bonds, property, &c., in V. 86, p. 545; V. 88, p. 1436, 1619; V. 90, p. 302; V. 93, p. 162.

The consol. mtge. bonds as of Jan. 5 1912 consist of the following: Series A, out, $16,359,800 (in addition $1,006,200 are held in the treasury and can be issued only for acquisition of additional property); Series B, $17,160,575, and Series C, $2,366,336. The ordinance grants franchises to operate on existing roads to May 1 1934, subject to the right of the city to purchase the property at any time at par of bonded and floating debt and 110% of capital stock, in accordance with the terms of the ordinance, or on and after Jan. 1 1918 to designate a purchaser or licensee in place of the co. on payment of same amount. On Feb. 17 1910 at a referendum election the electors ratified the ordinance (V. 89, p. 1667; V. 90, p. 167, 502). On July 10 1911 City Council passed an ordinance amending that of Dec. 1909 providing among other things, for additions to capital as required and particularly for the immediate expenditure of $2,500,000 for impts., extensions and equipment. The new ordinance also provides that the right of the city to propose exten., betterm'ts or impts. shall terminate whenever the unexpired term or any renewal thereof is less than 15 years, and also that during such period the company may operate at the maximum rate of fare and fix the schedules subject to the police power of the city. Provision is also made for the use of surplus earnings during this 15-yr. period, either in the payment of floating debt or the creation of a s. f. to purchase securities and reduce capital value. At a referendum election on Nov. 7 1911, the electors ratified the ordinance amending that of Dec. 1909.
Valuation.—Judge Tayler placed the value of the physical property of the Cleveland Elec. Ry. Co. at $17,511,306 and the franchise value at $3,615,844: total, $21,127,150; agreed value of property purchased from Forest City Ry. Co., $1,805,600; total valuation, $22,932,750. To this is added $1,158,300 interest or rental accrued, making the entire "capital value" $24,091,050. The bonded debt of $8,128,000 and floating indebtedness as of Jan. 1 1908, $1,288,000, or $9,416,000 in all, is deducted, leaving $14,675,050; agreed addition to equalize stock value, $550, making the "residue of capital value," i. e., the capital stock, $14,675,600 The valuation is to be increased for the purpose of fixing the price at which the city or its nominee may purchase the property by the amount of future requirements, including cost of new pay-as-you-enter cars and 75% of the cost of remodeling old cars as pay-as-you-enter cars.
Fares.—An experimental fare of 3c., with 1c. extra for transfers without rebate, had to be tried to see if it would yield the auth. int. on capital val.—5% on bonds, 6% on floating debt and capital stock. On June 1 1911 authorities ordered the fare reduced to 3c. cash fare, 1c. extra for transfer, but the latter to be rebated when taken up. V. 92, p. 1498; V. 93, p. 1190. Under the ordinance, fare to East Cleveland is same as city fare. Fare for other suburbs, 5c., or 11 tickets for 50c., according to contracts. The company's schedules and routes are subject to the supervision of the city and the rates of fare to be fixed so as to net a return of interest as stated above on the valuation of the property and permit of the maintenance at all times of a so-called interest fund of at least $500,000. V. 89, p. 1667. Maximum fare allowed is 4c. for a single fare, or 7 tickets for a quarter, with 1c. for transfer without rebate.
ORGANIZATION.—In 1908 changed name from the Cleveland Electric Railway Co. (which had in 1903 taken over the Cleveland City Ry.) to Cleveland Railway Co., and authorized new stock to the amount of $35,000,000. The old stock of Cleveland Electric Ry. was given a valuation of $55 per share, or $12,870,000 (the stock having formerly been $23,400,000), which valuation was agreed upon after extended conference, and which was paid in new stock issued by Cleveland Railway at a par ($100) valuation. The Forest City Ry. (which had first absorbed the Low Fare Ry.) was purchased for $1,805,600 stock of Cleveland Ry., the shares of the Forest City Ry. being accepted at their par ($100) value.
On March 10 1910 stockholders were offered the right to subscribe for 10% of new stock at par. V. 90, p. 771. $386,200 of new stock was taken.
On Jan. 26 1911 stockholders auth. a new $35,000,000 mtge. V. 92, p. 260.
On June 18 1910 motormen and conductors were awarded an increase in wages of 4 cents an hour, effective June 15 1910. V. 90, p. 1675.

DETROIT, MICH.

DETROIT UNITED RAILWAY.—(*See Map page* 44.)—Trolley.

ORGANIZATION.—Incorporated in Michigan Dec. 31 1900 and took over franchises and properties of the Detroit Citizens' Street Ry., the Detroit Electric Ry., the Detroit Ft. Wayne & Belle Isle and the Detroit Suburban. V. 72, p. 44, 183. Embraces all the street railway lines in Detroit.

Later absorbed by purchase the Detroit & Northwestern Ry., which is known as the Orchard Lake division, the Detroit & Pontiac Ry., known as the Pontiac division, the Wyandotte & Detroit River Ry., known as the Wyandotte division, and the Detroit & Flint, formerly the Detroit Rochester Romeo & Lake Orion Ry., and known as the Flint division. Owns entire capital stock ($2,000,000) of the Detroit & Port Huron Shore Line.

In Aug. 1901 purchased 2,970 shares (all) of the stock of the Sandwich Windsor & Amherstburg Ry.; 180 shares (all) of the stock of the City Electric Ry. and the People's Electric Light plant of Windsor, Ont.

In Feb. 1906 issued $1,000,000 notes for the purpose of acquiring the entire stock of the Detroit Monroe & Toledo Short Line Ry. V. 82, p. 392. These were paid off March 1 1909. V. 88, p. 563.

In Jan. 1907 company purchased control of the Detroit Ypsilanti Ann Arbor & Jackson Ry., the Jackson Ann Arbor & Detroit Ry. and the Detroit Plymouth & Northville Ry., and reorganized them under the name of Detroit Jackson & Chicago Ry. V. 84, p. 450.

On Feb. 24 1911 Michigan RR. Comm. granted permission to issue $1,078,000 4½% bonds for improvements and betterments. V. 92, p. 594, 659.

The United States Supreme Court on March 3 1902 decided that the ordinance of 1889 compelling the Citizens' Street Ry. to sell 8 tickets for a quarter was invalid. (See V. 74, p. 528.)

On Sept. 28 1910 Mich. Supreme Court refused to grant a re-hearing from its decision that company must sell workingmen's tickets at rate of 8 for a quarter within specified hours and within city limits as extended. V. 91, p. 870.

In July 1906 a proposed ordinance extending the company's franchises until Dec. 4 1924 was submitted to the City Council. See V. 83, p. 271, 1170. V. 84, p. 338. Ordinance, however, fell through. Question of valuation of company's property in connection with proposed new franchise was in April 1910 submitted to a board of arbitration. V. 90, p. 976, 1101. Up to Jan. 1912 valuation had not been fixed.

On Nov. 13 1909 company decided to pay under protest the occupation tax of $300 a day called for by Hally resolution of Oct. 26 1909. The tax is for privilege, after Nov. 14 1909, of operating cars in streets where franchises have expired. V. 89, p. 1347. On July 8 1911 Wayne Circuit Court decided in favor of the city suit brought by city on Sept. 15 1910 to compel the company to pay $200 per day occupation tax, in addition to the $300 above. V. 93, p. 163. The entry of the decree was withheld in order that the Common Council might be consulted as to a modification or suspension of the ordinance or decree.

On May 1 1907 the Supreme Court of Michigan decided that the city of Detroit could not lay street railway tracks through its Department of Public Works (as attempted under an ordinance of the City Council passed in 1905), to be leased, as supposed, to an operating company. V. 84, p. 1052.

On April 25 1907 Judge Swan in the U. S. Court at Detroit granted an injunction (which July 24 1907 was made permanent) restraining the city from enforcing an ordinance seeking to compel the company to give 20 seconds' service on some of its lines. V. 84, p. 1052.

On July 23 1907 Judge Swan granted an injunction restraining the city from enacting an ordinance which provided that company can use patches of line on which franchises are said to have expired on condition only that 5 tickets be sold for 15 cents over entire lines or streets on which patches lie. V. 85, p. 345.

In April 1911 an agreement was entered into between the company and Mayor Thompson (ratified by City Council), whereby the company is permitted to build at once extensions and double-track its lines. Agreement provides that at any time city may purchase any of the extensions. V. 92, p. 956.

Proposed Municipal Purchase.—On Jan. 15 1912 the Mich. Supreme Court handed down a decision holding that the city could not legally vote at proposed election Jan. 23 1912 upon charter amendment to provide for municipal ownership of street railways. See V. 94, p. 207, 123. A similar decision was handed down by the same court on Feb. 1 1911. V.92,p.322.

In Jan. 1911 a Montreal syndicate underwrote $1,500,000 first consol. 4½s to provide for floating debt, &c. V. 91, p. 870, 945; V. 92, p. 59, 659.

Proposed Ordinance.—On Oct. 21 1911 Pres. Hutchins formally accepted the proposed ordinance passed by the Council Jan. 16 1912 (if approved by three-fifths of voters at referendum election which was to have been held Jan. 23 1912), which will provide for the sale of eight tickets for a quarter from 5 a. m. to 8 p. m. and six tickets for a quarter from 8 p. m. to 5 a. m., with universal transfers. City will have an option to purchase the system on 6 mos.' notice, the value to be fixed by appraisers. All existing franchises under which the company is operating are to expire in 1924, and all existing litigation between the city and the company is to be discontinued. Provision is made for building much-needed extensions, which must equal 5% of the track mileage each year. V. 93, p. 1190.

(Plan in V. 76 p. 1143.) Through Metropolitan Street Railway stock, the Kansas City Railway & Light Co. acquired the stock of the Central Electric Railway Co. and practically all of the stock of the Kansas City Elevated Railway Co., and, through the stock of the Kansas City Electric Light Co., it acquired the stock of the Edison Electric Light & Power Co. (of Kansas City), the Consolidated Electric Light & Power Co. the Standard Electric Light Co. and the Kansas City Electrical Wire Subway Company—except, of course, in each instance the qualification shares held by directors. Controls all the street railway, electric-lighting and power business in cities of Kansas City, Mo., and Kansas City, Kan.

Owns entire stock of the Kansas City & Westport Belt Ry. (a steam road, since converted to electricity), which on June 16 1906 absorbed the interurban South Side Ry., both having perpetual charters and being organized under the General Railroad Law of Missouri; also acquired capital stock of the Kansas City Heating Co., having a franchise which expires in 1935. This last distributes steam in the business centre of the city.

Street Railway Franchises.—The franchises of the railway lines in Kansas City, Mo., in which city the greater part of system is located, were revised and confirmed in July 1902 and franchises granted for extensions and valuable trackage rights in newly populated portions of the shopping and delivery districts, all of which franchises are operative to the uniform date of June 1 1925. The railway franchises in Kansas City, Kan., in Dec. 1902 were renewed, and authority was given to build extensions, all for the maximum period for which the city had power to grant the same, namely to Dec. 19 1922. By the terms of the franchises the rate of fare is definitely fixed at 5 cents, transfer privileges are provided, and the taxes practically limited to 8% of the annual gross receipts.

Electric Light Franchise.—The franchise of the Kansas City Electric Light Co. is perpetual.

Receivership.—On June 3 1911 Federal Judge W. C. Hook appointed Robt. J. Dunham (Ch. of K. C. Ry. & Lt. board of directors) of Chic. and Ford F. Harvey of Kansas City receivers for the Metropolitan St. Ry. (V. 92, p. 1564.) It is stated that receivers were appointed at the instance of bankers to conserve the property until satisfactory franchise relations with the city can be effected. No defaults have occurred. V. 93, p. 1191. See formal statement by R. J. Dunham and bankers' circular in V. 92, p. 1565. A protective committee has been formed calling for deposits of Metrop. bonds. V. 92, p. 1565. On June 15 1911 Judge Hook in U. S. Circuit Court authorized the receivers to pay prin. & int. of obligations of Metrop. St. Ry. maturing in 1911 to the amount of $984,640 from earnings of company, provided it would not unduly hamper operation of road. See V. 92, p. 1701. The city in Sept. 1911 having petitioned Judge Hook to require company to live up to its franchise obligations, Special Master Brumbach on Nov. 24 1911 reported that $8,274,800 would be required, provided it should be determined by law that the city has the right to enforce such requirements. See V. 93, p. 1532.

In 1906 absorbed the North Side Street Ry. (Robbinsdale line) and the St. Louis Park line; V. 83, p. 1472. In 1905 articles of incorporation were amended so as to make the charter perpetual. V. 80, p. 1914.

Franchise and Fares.—Mayor Haynes of Minneapolis on Feb.18 1907 signed an ordinance requiring street railways to sell six fares for 25 cents. V. 84, p. 451, 509. On Aug. 24 1907, however, Judge Lochren of the U. S. Circuit Court granted a permanent injunction against enforcing the ordinance (see V. 85, p. 532). On Jan. 3 1910 U. S. Supreme Court affirmed the decision of Judge Lochren. This decision sustains the company's claim to a 50-year franchise from July 1 1873, with the right to charge 5-cent fares. V.90, p.111.

Settlement with City of St. Paul.—For decision as to right to build new lines in St. Paul, see V. 79, p. 271, 2087, and for settlement with City of St Paul by which the city relinquishes its right of appeal from this decision and the company agrees to pay into the city treasury a gross earnings tax of 6%, see V. 80, p. 1175.

Decisions.—On April 21 1911 Judge Willard in U. S. Dist. Court at Minneapolis denied the application (V. 92, p. 1637) to restrain the enforcement of an ordinance directing the construction of 9½ miles of extensions.

New Subsidiaries.—Because of a decision of the Supreme Court holding that suburban lines, as railways, are amenable to the Minnesota 4% gross earnings tax, it was decided in Mch. 1910 to incorporate the Minneapolis & St. Paul Suburban RR. ($1,000,000 stock, increased to $3,000,000 in Jan. 1911; debt limit was also increased to $10,000,000; V. 92, p. 187), the Minnetonka & White Bear Navigation Co. ($250,000 stock) and the Rapid Transit Real Estate Corp., $15,000 stock, and to rearrange matters so that the suburban lines, the steamer lines and the hotels, parks, &c., of the company might be handled separately for taxation and accounting purposes. V. 90, p. 850.

NEW HAVEN, CONN.

NEW YORK NEW HAVEN & HARTFORD RY. (Trolley lines).

The New York New Haven & Hartford's interests in trolley lines is very extensive, and control originally was held through three organizations, the Connecticut lines having been comprised in the Consolidated Ry. Co., now merged in the New Haven, the Massachusetts street ry. properties (except as noted below) being held by the New Eng. Invest. & Secur. Co. and the Rhode Island lines by the Providence Securities Co., which latter has since passed to the New England Navigation Co. But, owing to the adverse Court decision noted below, the New Haven company severed direct connection with the Massachusetts trolley lines. In a statement made to the Massachusetts Legislature in Feb. 1909 (V. 88, p. 506) it was announced that the New England Navigation Co. had acquired by purchase the common shares actually issued of the New England Investment & Security Co. and that the indebtedness of the latter was also held by the Navigation Co. Furthermore, that the latter had sold the shares of the New England Investment & Security Co. so acquired to individuals for cash. In the New Haven annual report for 1908-09 Pres. Mellen stated that the stocks and indebtedness of the Worcester & Webster Street Ry. and of the Webster & Dudley Street Ry. had also been disposed of, "thus closing out the last financial interest of your company in Massachusetts street railways."

Control of Trolley Tracks Attacked.—The Supreme Judicial Court on May 8 1908 decided that the New York New Haven & Hartford RR., in securing control of Massachusetts street railways, was transgressing the law (see V. 86, p. 1225, 1285), and on June 23 1908 Court issued its decree prohibiting New Haven road from exercising any ownership over same directly or indirectly after July 1 1909. V. 86, p. 1590. On March 2 1909 full bench of Mass. Supreme Court affirmed this decree. V. 88, p. 625. On May 22 1908 the Federal Government began an action against the New York New Haven & Hartford, asserting that the acquisition of the trolley lines in the various States, as well as the Boston & Maine, was in violation of the Sherman Anti-Trust Law (V. 86, p. 1285), but in June 1909 Attorney-General Wickersham announced the abandonment of the suit. V. 88, p. 1621.

On Dec. 8 1911, however, it being thought that public sentiment was favorable to the measure, the New England Investment & Security Co., with the approval of the N. Y. N. H. & H. RR., filed a petition asking for an Act permitting either (1) the New Haven to purchase outright the assets of the Security Co. or (2) the formation of a new company to take over the various properties of the New Eng. Inv. & Sec. Co., the New Haven to own stock, bonds and other securities issued by corporation so organized, and to guar. divs. and liquidation value of such stock and the prin. and int. on such bonds or other obligations. See V. 93, p. 1669, 1788. On the same date another petition was filed, signed by the Selectmen of various towns in Western Mass., asking for legislation permitting the Berkshire St. Ry. to buy or consolidate with the Springfield St.Ry. on condition that the two systems be connected. V. 93, p. 1669. The former road had previously been purchased in July 1910 by the N. Y. N. H. & H. from the New Eng. Invest. & Secur. under an Act of Mass. Legislature passed in June 1910. V. 90, p. 1612; V. 91, p. 154. In Jan. 1911 a bill was introduced in Mass. Legislature authorizing the N. Y. N. H. & H. to own all the com. stock of a new company (Worcester Springfield & Berkshire St. Ry.), which is to take over, consolidate and operate all street railways at present controlled by New Eng. Invest. & Sec. Co. and Berkshire St. Ry. See V. 94, p. 208, and under New Eng. Invest. & Secur. Co. on subsequent page.

The operation of the New Haven's trolley properties is now vested in the following companies:

Berkshire Street Ry.	N. Y. Westch. & Bost. (under const.)
Connecticut Company.	Rhode Island Co.
Hoosick Falls RR. Co.	Vermont Company.
New York & Stamford Ry.	Westchester Street Ry.

CONNECTICUT COMPANY.

This is the company which operates the trolley lines in Connecticut controlled by the N. Y. N. H. & H. and which formerly were comprised in the Consolidated Railway Co. The latter company, the whole of whose $10,000,000 stock was owned by the N. Y. N. H. & H. RR. Co., was on May 31 1907 (after it had previously taken over the New Eng. Nav. Co. at a valuation of $20,000,000 and increased its stock to $30,000,000 for the purpose) consolidated with and merged into the New York New Haven & Hartford RR. The charter of the New Haven Co. was amended by Act of the Connecticut Legislature, approved March 26 1907, so as to permit the merger, and new stock of the New Haven Co. was issued, share for share, to represent the $30,000,000 stock of the Consolidated Railway Co.; V. 84, p. 1052, 1308. It was distinctly provided that the rights, powers and franchises of both companies should be vested in the enlarged company.

ORGANIZATION.—Incorporated in Connecticut. Stock, $40,000,000 all owned by N. Y. N. H. & H. June 1 1907 began operating the lines comprising the Consolidated Ry. (merged in 1907 in the N. Y. N. H. & H.) Feb. 28 1910 purchased substantially all the various street railway properties of the N Y. N. H. & H.

On Mch. 1 1910 all the gas, water and electric-light properties formerly operated by the Connecticut Co. were transferred to the Housatonic Pow. Co., which company increased its stock from $1,000,000 to $3,000,000, to pay for the acquisitions. On Jan. 1 1912, however, the Housatonic Pow. Co. was taken over under a sub-lease for 994 years dated Oct. 1 1911, by the United Elec. Lt. & Water Co. V. 94, p. 71; V. 93, p. 1669.

Re-financing.—In Sept. 1910, it was stated, arrangements had been made for re-financing the Connecticut Co., whereby the N. Y. N. H. & H. will take care of its bonds as they mature, thus ultimately leaving the Connecticut Co. free from debt. V. 91, p. 870.

Bonds.—The Consolidated Ry. debentures are not subject to call. All the debentures have printed on their face the statement that if a mortgage is made on any or all of the company's property which was owned on Jan. 1 1905, except to renew existing mortgages, the debentures shall participate in the security of such mortgage. The debentures due in 1930 bear 3% interest from Feb. 1 1905 for first 5 years, 3½ % for next 5 years, and 4 % for following 15 years, and were issued to pay for acquiring the Berkshire Street Ry. (V. 80, p. 471), which company was subsequently acquired by the New England Investment & Security Co., then in turn re-acquired by the N. Y. N. H. & H. The $3,500,000 debentures due April 1 1955 were issued to acquire the Hartford Street Ry. The $10,000,000 debentures of Jan. 1906 were issued to the N. Y. N. H. & Hartford for advances.

The Winchester Avenue bonds are joint obligations of the Winchester Avenue RR. Co. and the New Haven & West Haven, and cover all property owned or to be hereafter acquired under the charters. Of the Worcester & Connecticut Eastern bonds, no more will be issued. A *sinking fund* on these bonds commenced in 1908 of not to exceed 1% of bonds outstanding. Bonds can not be called, but may be bought on a 3¾% basis or better, and kept alive for sinking fund. See V. 75, p. 1204. Of the Montville Street Ry. 1st mtge. gold bonds the balance unissued can only be issued for 66% of actual certified cost of improvements or additions to property. Original mortgage of the Montville Street Ry. provided that bonds might be called in 1905 at 105, but through a supplemental mortgage this redemption clause was eliminated, so bonds are not now subject to call.

NEW ENGLAND INVESTMENT & SECURITY CO.

ORGANIZATION.—Is a voluntary association and was organized on June 25 1906 to take over the street railway properties in Massachusetts formerly controlled by The Consolidated Railway Co. V. 83, p. 492.

New Haven Road Divests Itself of Control.—In Feb. 1909 the N. Y. N. H. & H. announced to the Massachusetts Legislature (V. 88, p. 506) that it had disposed of all of its interest in the common shares of the N. E. Inv. & Sec. Co. for cash to individuals and that it no longer had any interest in the same, direct or indirect, see remarks concerning the matter under N. Y. N. H. & H. on a preceding page and V. 88, p. 945. In July 1909 Pres. Mellen of the N. Y. N. H. & H. wrote C. E. Mann, Clerk of Mass. RR. Comm., "this company is no longer directly or indirectly concerned in the control of any street railways in Massachusetts," thus complying with the Court decree that it must divest itself of all its holdings in street railways in Massachusetts by July 1 1909. See V 89, p. 163.

On July 1 1910 Mass. RR. Comm., having auth. the N. Y. N. H. & H. to purchase control of the Berkshire Street Ry., the N. E. Inv. & Sec. Co.'s interest in the same was transferred to that co. V. 90, p. 1612. V. 91, p. 157.

The company on Dec. 8 1911, with the approval of the N. Y. N. H. & H., filed a petition asking for an Act that will authorize the New Haven road either to purchase outright the securities of the Security Co., or to own control and guar. securities of a merger company to be organized to take over the various properties. In Jan. 1912 a bill (see V. 94, p. 207) was introduced in Mass. Legislature authorizing trustees of the New England Invest. & Secur. Co. to form a new corporation—Worcester Springfield & Berkshire Street Ry. Co.—to take over, consolidate and operate all street railways controlled by New England Invest. & Secur. Co. (incl. those controlled by Springfield Ry. and Worc. Rys. & Invest. Co.) and Berkshire St. Ry. See under N. Y. N. H. & H. on preceding page. V. 93, p. 1669, 1788; V. 94, p. 207.

ORGANIZATION.—Incorporated on Dec. 30 1911, and at midnight on Dec. 31 1911 took over the lines of the old Metropolitan Street Ry. sold at foreclosure (V. 93, p. 1787) on Dec. 29 1911, per plan in V. 93, p. 1533. The reorganization plan had not been formally approved by Pub. Ser. Comm. up to Jan. 23 1912. The sale did not include the leases of the Central Park North & East River RR., 28th & 29th Sts., the 2d Ave. RR. and Fulton St. RR. The latter road was abandoned in 1908 (V. 90, p. 1675). Co.*, including its lease of the Christopher & 10th St. RR. Cost of Reproduction.—The cost to reproduce the property, according to the appraisal of Ford, Bacon & Davis of N. Y., and real estate experts, is $105,123,000, exclusive of (*a*) certain reorgan. assets, value estimated at $5,000,000; (*b*) net invest. in superseded property, representing an actual outlay of $13,355,645, and (*c*) any "going concern" value, special value of existing franchises or other items of substantial importance in the production of the system. The total outstanding securities as provided in the plan will be $97,655,500.

Franchises.—All franchises are stated to be perpetual.

Transfers.—On Dec. 5 1911 the Public Service Comm. issued a formal order restoring on Jan. 1 1912 free transfers at 151 points. The order permits passengers to transfer from cars of one company to those of another and back again, if they desire, to the cars of the first, but not to the cars of a third company. However, when a passenger has returned on a free transfer to the cars of the company to which he paid his fare, he will be entitled to any further free transfers that that company has been accustomed to grant. V. 93, p. 1600. An appeal to the courts has been taken.

Suit to Forfeit Franchises.—Attorney-Gen. Carmody in Dec. 1911 began several suits to forfeit franchises and remove tracks of the old Metropolitan St. Ry. on a number of streets on the ground that tracks have not been kept in repair and are a menace to public safety. V. 93, p. 1600.

Brooklyn Bridge Connection.—Cars of the old Metropolitan lines began to run across the Williamsburgh Bridge in Jan. 1905.
